a comparative study of the lives and careers of hitler and stalin alternate chapters on each serve both to draw contrasts and highlight parallels the author gives his reasons for believing that the key to an understanding the character of the two is the same

laurence rees brilliantly combines powerful eye witness testimony vivid narrative and compelling analysis in this superb account of how two terrible dictators led their countries in the most destructive and inhumane war in history professor sir ian kershaw author of hitler hubris and hitler nemesis two 20th century tyrants stand apart from all the rest in terms of their ruthlessness and the degree to which they changed the world around them briefly allies during world war ii adolph hitler and josef stalin then tried to exterminate each other in sweeping campaigns unlike anything the modern world had ever seen affecting soldiers and civilians alike millions of miles of eastern europe were ruined in their fight to the death millions of lives sacrificed laurence rees has met more people who had direct experience of working for hitler and stalin than any other historian using their evidence he has pieced together a compelling comparative portrait of evil in which idealism is polluted by bloody pragmatism and human suffering is used casually as a political tool it s a jaw dropping description of two regimes stripped of moral anchors and doomed to destroy each other and those caught up in the vicious magnetism of their leadership

with the opening of russian and communist bloc archives dating from the soviet era there has been a significant increase of scholarly writings pertaining to joseph stalin widely considered to be among the most influential historical figures of the twentieth century stalin continues to be a source of intense study in the absence of a comprehensive compilation of periodical literature the need for joseph stalin an annotated bibliography of english language periodical literature to 2005 is conspicuous ranging from editorials and

news reports to academic articles the more than 1 700 sources cited collectively cover the full range of his life the various aspects of his leadership and virtually all facets of the system and practices traditionally associated with his name the coverage in this bibliography extends beyond the person of stalin to include the subjects of stalinism the stalinist system the stalin phenomenon and those policies and practices of the communist party and soviet state associated with him this volume also provides a record of scholarly opinion on stalin and sheds light on the evolution and current state of stalinology an effort has been made to list only those articles in which stalin figures prominently but in some instances articles have been included which do not center on stalin but are worthy of listing for other reasons the book is divided into fourteen main sections general studies and overviews biographical information and psychological assessments the revolutionary movement october revolution and civil war rise to power politics economics society and social policy nationalism and nationality policy culture religion philosophy and theory foreign relations and international communism military affairs and de stalinization including a subject index of several hundred headings and even greater number of subheadings this comprehensive annotated bibliography should be of benefit to those individuals who for the purpose of research or classroom

an animated adaptation of the story of the same title by maurice sendak in which a small boy makes a visit to the land of the wild things tells how he tames the creatures and returns home for primary grades

kissinger defines diplomacy with an overview of his own interpretation of history and personal accounts of negotiations with world leaders

challenging previous accounts megargee shatters the myth that german generals would have prevailed in world war ii if only hitler had not meddled in their affairs instead he observes that the military s strategic ideas were no better than hitler s and often were worse 20 photos

there is still a widespread assumption that the second world war was won in the west when in fact the tide was first turned on the eastern front this book written by two internationally known experts on the subject argues that hitler s ostkrieg was the central event of the global conflict between the allies and the axis powers however this is much more than a traditional military political history it deals with nazi crimes and economic exploitation with the psychological war no less significantly this volume provides a guide to the extensive literature on the war in the east including largely unknown soviet writing on the subject indispensable for military historians but also for all scholars who approach this crucial period in world history from a socio economic or cultural perspective

it seemed that whenever mussolini acted on his own it was bad news for hitler indeed the führer s relations with his axis partners were fraught with an almost total lack of coordination compared to the allies the coalition was hardly an alliance at all focusing on germany s military relations with italy romania hungary and finland richard dinardo unearths a wealth of information that reveals how the axis coalition largely undermined hitler s objectives from the eastern front to the balkans mediterranean and north africa dinardo argues that the axis military alliance was doomed from the beginning by a lack of common war aims the absence of a unified command structure and each nation s fundamental mistrust of the others germany was disinclined to make the kinds of compromises that successful wartime partnerships demanded and because hitler insisted on separate pacts with each nation italy and finland often found themselves conducting counterproductive parallel wars on their own dinardo s detailed assessments of ground naval and air operations reveal precisely why the axis allies were so dysfunctional as a collective force sometimes for seemingly mundane but vital reasons a shortage of

interpreters for example his analysis covers coalition warfare at every level demonstrating that some military services were better at working with their allies than others while also pointing to rare successes such as rommel s effective coordination with italian forces in north africa in the end while some individual axis units fought with distinction if not on a par with the vaunted wehrmacht and helped germany achieve some of its military aims the coalition s overall military performance was riddled with disappointments breaking new ground dinardo s work enlarges our understanding of germany s defeat while at the same time offering a timely reminder of the challenges presented by coalition warfare

like its predecessor one of the most popular volumes in the european history series this second edition provides a unique interpretative comparison of the economics propaganda culture and education and healthcare systems of all three forms of european totalitarianism punctuated by vivid portraits of the dictators youths early careers personal relationships management styles and cults of personality the second edition of this fascinating book features a greatly expanded photographic essay as well as a consideration of the very latest scholarship this succinct and adept description of probably the most frightening phenomenon of the twentieth century remains ideal for use in courses on german european and world history its broad interdisciplinary scope also makes it an excellent choice of supplementary reading for courses in government international relations economics sociology women s studies and ethics

reviews of significant fiction and nonfiction published in 1992 provides coverage for works that are likely to be of particular interest to the general reader that reflect the publishing trends of a given year and that will stand up to the test of time

this study of illness in heads of government between 1901 and 2007 considers how illness and therapy both physical and mental affect the process of government and decision making leading to acts of folly in the sense of stupidity or rashness

this bibliography is a compilation of approximately 3500 english language works by and about the major political leaders and military figures of the second world war the bibliography is intended to aid librarians in answering reference questions concerning what works are available on a certain individual to aid graduate and undergraduate students in researching potential historical topics and to aid the general reader in choosing a good biography of a particular individual

includes no 53a british wartime books for young people

did the west win or did inherent flaws doom the soviet system from the start book jacket

the use of terror has been a characteristic of russia from the days of the tsars during the great patriotic war soviet soldiers and citizens feared not only the germans but the secret police the agents of the nkvd waged a merciless campaign against their own people the full extent of this operation is told in this compelling study

the tyrants discussed in the nature of despotism share common backgrounds behaviours and motivations that when viewed together can be seen as forming the character of the despot from more predictable origins such as violent miserable childhoods to those that seem more surprising such as frustrated artistic impulses each aspect of despotic cause and effect is examined in detail
