samuel walker proposes that our experiences of embodiment play an important role in the development of our normative values and that

the legal system should adopt an embodied understanding of all individuals rethinking current legal paradigms he challenges the notion that bodies can be understood in isolation from networks of connections and suggests ways that the law can be adjusted to improve its treatment of our bodies the book provides a comprehensive approach to the analysis of bodies in legal contexts discussing an alternative model of legal subjects to the traditional judicial concept

the rise and spread of the internet has accelerated the global flows of money technology and information that are increasingly perceived as a challenge to the traditional regulatory powers of nation states and the effectiveness of their constitutions the acceleration of these flows poses new legal and political problems to their regulation and control as shown by recent conflicts between google and the european union eu this book investigates the transnational constitutional dimension of recent conflicts between google and the eu in the areas of competition taxation and human rights more than a simple case study it explores how the new conflicts originating from the worldwide expansion of the internet economy are being dealt with by the institutional mechanisms available at the european level the analysis of these conflicts exposes the tensions and contradictions between on the one hand legal and political systems that are limited by territory and on the other hand the inherently global functioning of the internet the eu s promising initiatives to extend the protection of privacy in cyberspace set the stage for a broader dialogue on constitutional problems related to the enforcement of fundamental rights and the legitimate exercise of power that are common to different legal orders of world society nevertheless the different ways of dealing with the competition and fiscal aspects of the conflicts with google also indicate the same limits that are generally attributed to the very project of european integration showing that the constitutionalization of the economy tends to outpace the constitutionalization of politics providing a detailed account of the unfolding of these conflicts and their wider consequences to the future of the internet this book will appeal to scholars working in eu law international law and constitutional law as well as those in the fields of political science and sociology

the rapid development of new information and communication technologies has changed people s everyday life and consumption patterns significantly the worldwide spread of those technologies provides many innovations for consumers but it can also bear risks such as the indiscriminate collection storage and cross border flow of personal data illegal spying on internet activities dissemination of personal information and abuse of user passwords the study deals with the current state of consumer data protection law in brazil china and germany from a comparative perspective it covers the main legal issues of consumer privacy and data protection in these countries and seeks to explain current issues and case law concerning consumer data protection from a practical perspective

the subjects of privacy and data protection are more relevant than ever with the european general data protection regulation gdpr becoming enforceable in may 2018 this volume brings together papers that offer conceptual analyses highlight issues propose solutions

and discuss practices regarding privacy and data protection it is one of the results of the tenth annual international conference on computers privacy and data protection cpdp 2017 held in brussels in january 2017 the book explores directive 95/46/eu and the gdpr moving from a market framing to a treaty base games frame the gdpr requirements regarding machine learning the need for transparency in automated decision making systems to warrant against wrong decisions and protect privacy the riskrevolution in eu data protection law data security challenges of industry 4.0 new types of data introduced in the gdpr privacy design implications of conversational agents and reasonable expectations of data protection in intelligent orthoses this interdisciplinary book was written while the implications of the general data protection regulation 2016/679 were beginning to become clear it discusses open issues and daring and prospective approaches it will serve as an insightful resource for readers with an interest in computers privacy and data protection

this book focuses on protection needs and new aspects of personality and data protection rights on the internet presenting a comprehensive review that discusses and compares international european and national brazilian german pakistani perspectives it deals with overarching questions such as whether universal minimum standards of privacy protection can be developed or how regional data protection rights can be safeguarded and enforced extraterritorially given the conditions of the internet furthermore the book addresses new challenges and novel rights e.g. data retention and protection against mass surveillance the right to be forgotten rights to anonymity legal issues of the digital estate or rights relating to algorithmic decision making furthermore the book explores how well known paradigms such as liability for personality rights violations or damages have to be adapted in view of the significant role of intermediaries

trb's national cooperative highway research program nchrp report 831 civil integrated management cim for departments of transportation volume 1 guidebook presents guidance for collecting organizing and managing information in digital formats about a highway or other transportation construction project volume 2 research report provides background material on collecting organizing and managing information in digital formats about a highway or other transportation construction project the term civil integrated management cim has been adopted in recent years to encompass an assortment of practices and tools entailing collection organization and management of information in digital formats about highway or other transportation construction projects transportation agencies may realize significant benefits from increased adoption of these practices which may be useful when managing an asset's initial planning phase through its in service maintenance
