napoleon s invasion of the middle east marks the beginning of the modern era in the region this book traces the developments that led to the making of a new and separate geographical political entity in the middle east known as eretz israel and the establishment of the state of israel within its bounds thus its time frame runs from napoleon s invasion of eretz israel palestine in 1799 to the establishment of israel in 1948 1949 eretz israel as the formal name of a separate entity in the modern era first appeared in the early translations into hebrew of the balfour declaration while in the original document the country was referred to as palestine during the period of ottoman rule the territory that would in time be called eretz israel palestine was not a separate political unit among jews use of eretz israel increased only after the beginning of Zionist aliyot had the Zionist movement not arisen it is doubtful whether the development to which this study is devoted would have occurred the motivating force behind that process is without doubt the Zionist element that is why Jews are the major protagonists in this book

the book is a study of the evolving history of knowledge in the arts and sciences in the modern era from 1648 through the present modernism is treated as an epoch with evolving disciplines whose articulated problems of a time and the inquiry methods to address them develop in a coordinated manner given a mutual awareness when one organizes the development of knowledge over periods of years and gives it an appellation such as modernism the organization of facts is guided by concepts and values discerned throughout these periods these facts of knowledge development share sufficient understandings to be called an era or an epoch or other terms that insist on the shared aspects of those years one can call such an effort a metahistory in that what is tracked is not merely a knowledge that

is political economic ideological sociological or scientific but an overview that tracks the respective conceptual developments of the fields in how they have changed and augmented their problem formulations inquiry methods and explanatory conceptions over time
