complete maintenance and repair information for your honda cbf125 and cb125f

this is a service and repair manual for honda cbf125

keith weighill has many years of experience working with motorcycles both in the trade and as a former lecturer in motorcycle engineering at merton college his book provides the diy mechanic with procedures and useful advice on servicing and minor repairs the book is divided into six chapters covering tools service schedule engine procedures chassis electrics and accessories

you are probably reading this bit because you ride a bike and you want to know how it works or maybe you wish to learn a thing or two about motorcycle maintenance better still you probably wish to attempt servicing and maintaining your bike all by yourself the diy way this is the book for you then to most of us motorcycle maintenance is cleaning the bike and taking it for a service frequently but there is actually much more to it than cleaning and oiling it involves performing a specific set of tasks that need to be carried according to a specific schedule but any of this information is not readily available and is too technical for the regular bike owner this book aims to provide all that necessary information in the most straightforward simple fashion it has been written specifically to serve an absolute beginner to motorcycle maintenance and the whole do it yourself diy ethic this book tries not just to show how easy motorcycle maintenance is but also to show how much fun it actually can be

a guide to motorcycle maintenance and repair that provides information on basic engine components shop safety protection tools and instruments diagnostic procedures electrical

systems transmissions frame and suspension systems and other related topics

this is one in a series of manuals for car or motorcycle owners each book provides information on routine maintenance and servicing with tasks described and photographed in a step by step sequence so that even a novice can do the work

motorcycle maintenance made easy aimed at the diy mechanic and students embarking on courses in motorcycle engineering service tasks are described in detail and illustrated with over 900 color photographs information on how to build up a toolkit and keep service records tools testing and measuring equipment oils and workshop equipment using a service schedule and keeping records engine oil and filter valve clearances compression test air and fuel filters carburetor balance coolant spark plugs clutch and exhaust system chassis chain sprockets tires disc brakes drum brakes wheel bearings front forks steering head bearings rear shock handlebars swinging arm bearings cables footrests stands and bodywork electrics batter fuses bulbs horn switches and wiring accessories twin horns fork gaiters top box and drive chain oiler

motorcycles fundamentals service repair covers the construction operation service and repair of motorcycle systems and components this comprehensive textbook also includes information on atvs utvs and scooters and is applicable to all makes and models it is heavily illustrated with quality color photos and illustrations designed for maximum learning
