landmark cases in the law of contract offers twelve original essays by leading contract scholars as with the essays in the companion volume landmark cases in the law of restitution hart 2006 each essay takes as its focus a particular leading case and analyses that case in its historical or theoretical context the cases range from the early eighteenth to the late twentieth centuries and deal with an array of contractual doctrines some of the essays call for their case to be stripped of its landmark status whilst others argue that it has more to offer than we have previously appreciated the particular historical context of these landmark cases as revealed by the authors often shows that our current assumptions about the case and what it stands for are either mistaken or require radical modification the book also explores several common themes which are fundamental to the development of the law of contract for instance the influence of commercial expectations appeals to reason and the significance of particular judicial ideologies and techniques

this collection of essays highlights the sometimes absurd outcomes which an unjustified overprotection of intellectual property ip may lead to it collects and comments on a series of ip disputes which have taken the notion of ip protection to extremes from individuals being sued for hundreds of thousands of dollars for sharing a playlist to sports spectators being arrested for wearing the wrong dresses passing through granting patents for inventions obtained by misappropriating traditional knowledge and trademark protection of merely descriptive signs this book brings together a broad range of examples from across the ip spectrum where protection and enforcement have been used or threatened on unreasonable and or untenable grounds the aim of the book is to criticise these excesses precisely because they harm ip and because they contribute to creating an environment where more and more people are led to hate ip and view it as a protectionist regime which discourages creativity in innovation and ends up safeguarding the owners of monopolistic rights which restrict trade competition and people s freedom this is not therefore a book against ip it is instead a call for change and an attempt to save ip through critiquing its excesses and preventing such a fascinating area of law from continuing to be an easy target for criticism the book includes a foreword by jason mazzone albert e jenner jr professor of law at the university of illinois usa
