6 Understanding Radionics and Its Principles

Before delving into the construction process, it's vital to grasp the fundamental principles behind radionics. Radionics is based on the idea that the human mind can influence physical systems through focused intention, and that certain devices can amplify or direct this energy.

Core Concepts in Radionics

- **Vibrational Frequencies:** Everything emits energy at specific frequencies. Radionics devices aim to manipulate or detect these.
- **Intent and Focus:** The practitioner's mental focus is central to the effectiveness of the device.
- **Resonance and Amplification:** Devices are designed to resonate with targeted energies or intentions to amplify their effect.

Understanding these principles helps in designing a machine that aligns with radionics philosophy and enhances its potential efficacy.

--- Basic Components of a Radionics Machine

Constructing a radionics device involves assembling several core components, each serving a specific purpose:

- **Main Elements**
 - **Electrodes or Probes:** Create a physical interface for energy transfer.
 - **Circuit Board or Oscillator:** Generates specific frequencies or signals.
 - **Power Source:** Provides the necessary energy for operation.
 - **Focus or**

Intent Area: A space or item used to concentrate intentions. - Amplification Mechanism: Enhances the energy signal. Each component must be carefully selected and assembled to ensure the device functions as intended. --- Gathering Materials and Tools Building a radionics machine requires both electronic and non-electronic materials. Here's a comprehensive list: Materials Needed - Electrodes or Probes: Metal rods, wires, or coils (copper or brass are common). - Circuit Components: - Oscillator circuit (using op-amps or transistors). - Capacitors and resistors. - Diodes and transistors for signal modulation. - Variable resistors or potentiometers for tuning. - Power Supply: Batteries (9V, 12V) or dc power adapters. - Base or Frame: Wood, plastic, or metal enclosure. - Focus Items: Crystals, photographs, or objects associated with the intention. - Additional Components: - LEDs or indicator lights. - Switches and How To Build A Radionics Machine 7 knobs for control. - Wires and soldering supplies. - Tools: - Soldering iron and solder. - Multimeter. - Screwdrivers. - Drill (if creating holes in the enclosure). - Wire strippers. radionics is an extraordinary technique of energy balancing that was born at the beginning of 900 and now has operators all over the world the great english pioneer george de la warr defined it the science that studies the action of mind on matter and the union of all things one of its peculiarities is in fact the possibility to operate at a distance by means of the radiesthetic faculty and with specific instruments the radionic operator can analyze and intervene on any system living or not living that is near him as well as on the other side of the world although this may seem absurd the new discoveries of physics confirm that at certain levels there is no separation and we are one as claimed by the ancient knowledge radionics demonstrates this daily to thousands of people around the world who use it to send or receive treatment to carry out its action radionics uses pendulums graphs symbols shapes instruments of many types although it uses in some cases electronic instruments it has nothing to do with this science in fact it operates exclusively at those pre physical levels which subtend matter the fields of action of radionics are many in reality there is no sector on which it is not possible to intervene positively with this very special technique precious for the health and the future of man and of the whole planet this text offers the reader the basis for making the most of this wonderful and fascinating branch of human knowledge

radionics is defined as a method of diagnosis and therapy which is primarily concerned with the utilization of subtle force fields and energies for the purpose of investigating and combating the causes of disease which ravage humanity and the other kingdoms of nature but in examining the history and development of radionics from the pioneering work of dr albert abrams and ruth drown to the latest experimental work at the de la warr laboratories david tansley discovered a curious paradox in literature on the subject and in the rate books which provide the very core of radionic therapeutic measures there are plenty of references to man s physical organic systems but little regarding the probability of underlying force fields which might govern and determine the health of the physical form this book represents an informed endeavour to redress the balance by providing a simple yet practical outline of the subtle anatomy of man the theory is not new abrams

diagnosed at a distance and drown treated absent patients david tansley believes that the time is ripe for radionics to bear witness to an energy field of a more subtle nature that is in fact its innate purpose
