in overcoming crystal methamphetamine addiction one of the few books to address the topic for a general audience dr steven lee md a psychiatrist who specializes in crystal meth addiction offers a complete guide to the drug its effects and how to overcome it based on extensive scientific and social research and drawing from his professional experience he covers everything from the definition and history of crystal meth to the physical and psychological effects from dealing with the addictive personality to helping a friend or family member cope with it he focuses on understanding rather than outright condemnation of the drug and empathetically covers all of the crucial questions what is crystal meth how is it made how does it affect the body how do you know if you re addicted to it how do you stop using it what if you don t want to stop if you are

going to use cm anyway how can you minimize the damage what if you quit but slipped and used again

describes what crystal meth is and the effects on the body and mind

paul butler was an ambitious federal prosecutor a harvard law grad who gave up his corporate law salary to fight the good fight until one day he was arrested on the street and charged with a crime he didn't commit the volokh conspiracy calls butler's account of his trial the most riveting first chapter i have ever read in a book harvard law professor charles ogletree calls a must read butler looks at places where ordinary citizens meet the justice system as jurors witnesses and in encounters with the police and explores what doing the right thing means in a corrupt system since let's get free's publication in spring 2009 butler has become the go to person for commentary on criminal justice and race relations he appeared on abc news good morning america and fox news published op eds in the new york times and other national papers and is in demand to speak across the country the paperback edition brings butler's groundbreaking and highly controversial arguments jury nullification voting not guilty in drug cases as a form of protest just saying no when the police request your permission to search and refusing to work inside the system as a snitch or a prosecutor to a whole new audience

the national institute of health states that methamphetamine increases the amount of dopamine in the brain a chemical that is involved in body movement motivation pleasure and reward the drug causes an intense high which fades quickly nearly 12 million people reported using the drug in the past year while 440 000 people reported using it in the past month this crucial edition delves into the history of methamphetamine as a recreational drug and as a big business for criminal enterprises it also discusses the toll that methamphetamine addiction takes on its users as well as families and communities in general the book concludes by discussing processes and methods used to treat meth addiction and how law enforcement agencies are trying to combat the meth industry

the goal of this book is to help train hazmat response teams and other responders in disaster training techniques and planning the book will also help define and sharpen training plans and assumptions focusing on lessons learned from real world experiences during actual disasters the book will help to establish a well trained professional 1st responder individuals and teams such lessons are emphasized so that planners and responders learn to anticipate how their community is likely to react under real disaster conditions and plan accordingly

this book describes the evolving cbrn risk landscape and highlights advances in

the core cbrn technologies including when combined with improvised explosive devices cbrne threats it analyses how associated technologies create new safety and security risks challenging certain assumptions that underlie current control regimes the book also shows how technologies can be enablers for more effective strategies to mitigate these risks 21st century safety and security risks emanating from chemical biological radiological and nuclear materials whether resulting from natural events accidents or malevolent use are increasingly shaped by technologies that enable their development production or use in ways that differ from the past artificial intelligence the use of cyberspace the revolution in the life sciences new manufacturing methods new platforms and equipment for agent delivery hypersonic weapons systems information tools utilised in hybrid warfare these and other technologies are reshaping the global security environment and cbrn landscape they are leading to a growing potential for highly targeted violence and they can lead to greater instability and vulnerability worldwide at the same time technology offers solutions to manage cbrn risks examples are faster detection more accurate characterisation of the nature and origin of cbrn agents new forensic investigation methods or new medical treatments for victims of cbrn incidents new educational concepts help to foster a culture of responsibility in science and technology and strengthen governance new training methods help develop practical skills to manage cbrn risks more effectively the book concludes that there is a growing need for a holistic framework towards cbrn risk mitigation traditional arms control mechanisms such as global regional or bilateral treaties and export controls are still needed as they provide a necessary legal and institutional framework but laws and technology denial alone will not suffice and institutional mechanisms can at times be weak given the pace of technological progress and the diffusion of critical knowledge tools and materials policymakers must accept that cbrn risks cannot be eliminated altogether instead society has to learn to manage these risks and develop resilience against them this requires a softer broadly based multi stakeholder approach involving governments industry the research and development communities educators and civil society furthermore educating policymakers that cutting edge technologies may seriously affect global strategic stability could create incentives for developing a more creative and contemporary arms control strategy that fosters cooperation rather than incremental polarisation
