structural integrity potential casualties financial losses but never in all these discussions did anyone imagine that somebody would try to fly a plane into these buildings or if they did it would be something small not a commercial airliner you have to think about this not from our point of view but from the perspective of 1994 they really believed that someone was at some point going to drive another truck into the basement finish what they'd tried to do in '93 this became a real panic after that timothy mcveigh thing in oklahoma city oh yeah that's right that was '95 yeah the guy parked a fertilizer truck next to the building and the whole thing came down so the consensus at the time was that someone might try to blow up the buildings again from the street level or the basement hell even the subway was identified as a possible route what no one wanted to talk about was that if you blew up the building from the basement the entire structure might topple over like a domino anything in a thousand foot radius could be destroyed including the other tower i took a sip of my drink that seems highly unlikely i'm sure the engineers who designed chernobyl said the same thing anyway they came up with a plan that would prevent the building from toppling over a controlled demolition exactly a completely vertical collapse so the building wouldn't kill as many people i mean nowadays there are residential apartments in that area i looked at dewey i was interested but unconvinced how many others bought into the same crazy theories
