forming and machining of polymers ceramics and composites targets the two important manufacturing processes where plastic  
deformation is involved to give the required shape and size to the raw material the main goal of the book is to represent the  
recent developments in the field of forming and machining of different non metals especially polymers composites and ceramics  
special focus is on the advancement of these processes to manufacture components from these non metals presents exclusive  
material dedicated to forming and machining of non metals that is polymers ceramics and composites provides comprehensive  
coverage of all important topics related to non metals processing covers basics and current research in the field of forming and  
machining of non metals focuses on sustainability interventions and intelligent manufacturing techniques for quality and  
productivity in forming and machining of non metals discusses conventional and non conventional machining and  
microfabrication aspects for fabrication and processing of non metals this book is aimed at graduate students and researchers in  
materials processing and machine design

thermal characterization of polymeric materials is a critical review and a concise evaluation of the application of thermal  
analysis in polymer science and engineering this book is divided into nine chapters that specifically tackle the instrumentation

theory and a wide variety of applications of thermal characterization the introductory chapters provide an overview of all aspects of thermal analytical methods and apparatus and the theory underlying the basic principles of thermal analysis these chapters also examine the theories and functions of state for thermometry dilatometry thermomechanical analysis calorimetry thermogravimetry these topics are followed by a discussion on single component and multicomponent systems and their phase transitions as influenced by concentration pressure deformation molecular weight and copolymerization the subsequent chapters explore the influence of important chemical and physical parameters on the glass transition crystallization and melting of thermoplastic materials the discussion then shifts to the theoretical aspects of polymer polymer compatibility phase separation and miscibility in mixed polymer systems this book further considers the thermal analysis in thermosets elastomers and fibers the concluding chapters present the methods of obtaining information on the relative flammability properties of polymers for screening fire retardant additives and for studying the mechanism of flame inhibition these chapters also look into the thermal analysis of antioxidants stabilizers lubricants plasticizers impact modifiers and fire retardants polymer scientists and researchers will find this book invaluable
