How to Build a Radionics Machine: A Comprehensive Guide Radionics machine building has gained popularity among those interested in alternative healing, energy work, and esoteric science. These devices are believed to harness subtle energies, focusing intent and thought to influence physical, mental, or spiritual outcomes. If you're intrigued by the concept and want to create your own radionics device, this guide will walk you through the essential steps, materials, and considerations involved in building a functional and effective radionics machine. --- How To Build A Radionics Machine 6 Understanding Radionics and Its Principles Before delving into the construction process, it's vital to grasp the fundamental principles behind radionics. Radionics is based on the idea that the human mind can influence physical systems through focused intention, and that certain devices can amplify or direct this energy. Core Concepts in Radionics - Vibrational Frequencies: Everything emits energy at specific frequencies. Radionics devices aim to manipulate or detect these. - Intent and Focus: The practitioner's mental focus is central to the effectiveness of the device. - Resonance and Amplification: Devices are designed to resonate with targeted energies or intentions to amplify their effect. Understanding these principles helps in designing a machine that aligns with radionics philosophy and enhances its potential efficacy. --- Basic Components of a Radionics Machine Constructing a radionics device involves assembling several core components, each serving a specific purpose: Main Elements - Electrodes or

Probes: Create a physical interface for energy transfer. - Circuit Board or Oscillator: Generates specific frequencies or signals. - Power Source: Provides the necessary energy for operation. - Focus or Intent Area: A space or item used to concentrate intentions. - Amplification Mechanism: Enhances the energy signal. Each component must be carefully selected and assembled to ensure the device functions as intended. --- Gathering Materials and Tools Building a radionics machine requires both electronic and non-electronic materials. Here's a comprehensive list: Materials Needed - Electrodes or Probes: Metal rods, wires, or coils (copper or brass are common). - Circuit Components: - Oscillator circuit (using op-amps or transistors). - Capacitors and resistors. - Diodes and transistors for signal modulation. - Variable resistors or potentiometers for tuning. - Power Supply: Batteries (9V, 12V) or dc power adapters. - Base or Frame: Wood, plastic, or metal enclosure. - Focus Items: Crystals, photographs, or objects associated with the intention. - Additional Components: - LEDs or indicator lights. - Switches and How To Build A Radionics Machine 7 knobs for control. - Wires and soldering supplies. - Tools: - Soldering iron and solder. - Multimeter. - Screwdrivers. - Drill (if creating holes in the enclosure). - Wire strippers. Gathering quality materials and precise tools will facilitate smoother assembly and more reliable operation. --- Designing the Circuit The heart of your radionics machine is its electronic circuit. While advanced designs can be complex, a basic oscillator circuit can be built with relative ease. Simple Oscillator Circuit for Radionics A common design involves using an operational amplifier or transistor to generate a continuous signal. Basic steps: 1. Select a Power Source: Connect your battery or power supply to the circuit. 2. Build the Oscillator: Use an op-amp or transistor, resistors, and capacitors to create a stable frequency. 3. Add Tuning Controls: Incorporate potentiometers to adjust the frequency. 4. Connect Electrodes: Attach probes or electrodes to output points to direct the energy. 5. Incorporate Indicators: Use LEDs to show when the device is active or to indicate tuning. Note: For a beginner, a simple astable multivibrator circuit can serve as a basic oscillator. Safety Precautions - Always verify circuit connections with a multimeter before powering. - Use insulated wires and proper grounding. - Avoid creating high-voltage circuits that can pose shock hazards. --- Assembling the Radionics Machine Once the circuit is designed and components are ready, proceed with assembly: Step-by-Step Assembly 1. Prepare the Base: Choose a sturdy, non-conductive base for mounting components. 2. Mount the Circuit: Securely fix the circuit board or prototype on the base. 3. Install Electrodes: Attach probes or electrodes to the circuit's output points, ensuring good electrical contact. 4. Connect Power: Wire your power source, ensuring correct polarity. 5. Add Controls: Install knobs or switches for tuning and operation. 6. Set Up Focus Area: Place crystals, photographs, or objects representing the intention near the device. 7. Enclosure: Enclose the assembly to protect components and to create a dedicated space for focused work. --- How To Build A Radionics Machine 8 Calibration and Tuning A critical aspect of building a radionics machine is calibration—adjusting it to produce the desired frequencies and energies. Methods of Calibration - Using a Multimeter: Measure the output frequency to ensure it matches your target. - Trial and Error: Adjust potentiometers while observing indicators until the desired resonance is achieved. - Energy Testing: Use your own sensitivity or a test object to feel or observe the energy effect. Tip: Keep detailed records of settings for future reference and reproducibility. --- Enhancing Effectiveness Beyond basic construction, several factors can influence the machine's efficacy: Adding Features - Crystals or Resonators: Incorporate quartz or other crystals to stabilize or enhance frequencies. - Visual or

Auditory Cues: Use lights or sounds to reinforce focus or signal operation. - Data Storage: Attach a small memory device or write down specific settings for different intentions. radionics is an extraordinary technique of energy balancing that was born at the beginning of 900 and now has operators all over the world the great english pioneer george de la warr defined it the science that studies the action of mind on matter and the union of all things one of its peculiarities is in fact the possibility to operate at a distance by means of the radiesthetic faculty and with specific instruments the radionic operator can analyze and intervene on any system living or not living that is near him as well as on the other

side of the world although this may seem absurd the new discoveries of physics confirm that at certain levels there is no separation and we are one as claimed by the ancient knowledge radionics demonstrates this daily to thousands of people around the world who use it to send or receive treatment to carry out its action radionics uses pendulums graphs symbols shapes instruments of many types although it uses in some cases electronic instruments it has nothing to do with this science in fact it operates exclusively at those pre physical levels which subtend matter the fields of action of radionics are many in reality there is no sector on which it is not possible to intervene positively with this very special technique precious for the health and the future of man and of the whole planet this text offers the reader the basis for making the most of this wonderful and fascinating branch of human knowledge

radionics is defined as a method of diagnosis and therapy which is primarily concerned with the utilization of subtle force fields and energies for the purpose of investigating and combating the causes of disease which ravage humanity and the other kingdoms of nature but in examining the history and development of radionics from the pioneering work of dr albert abrams and ruth drown to the latest experimental work at the de la warr laboratories david tansley discovered a curious paradox in literature on the subject and in the rate books which provide the very core of radionic therapeutic measures there are plenty of references to man's physical organic systems but little regarding the probability of underlying force fields which might govern and determine the health of the physical form this book represents an informed endeavour to redress the balance by providing a simple yet practical outline of the subtle anatomy of man the theory is not new abrams diagnosed at a distance and drown treated absent patients david tansley believes that the time is ripe for radionics to bear witness to an energy field of a more subtle nature that is in fact its innate purpose
