the second edition of gas chromatography and mass spectrometry a practical guide follows the highly successful first edition by f g kitson b s larsen and c n mcewen 1996 which was designed as an indispensable resource for gc ms practitioners regardless of whether they are a novice or well experienced the fundamentals section has been extensively reworked from the original edition to give more depth of an understanding of the techniques and science involved with gc ms even with this expansion the original brevity and simple didactic style has been retained information on chromatographic peak deconvolution has been added along with a more in depth understanding of the use of mass spectral databases in the identification of unknowns since the last edition a number of advances in gc inlet systems and sample introduction techniques have

occurred and they are included in the new edition other updates include a discussion on fast gc and options for combining gc detectors with mass spectrometry the section regarding gc conditions derivatization and mass spectral interpretation of specific compound types has the same number of compound types as the original edition but the information in each section has been expanded to not only explain some of the spectra but to also explain why certain fragmentations take place the number of appendices has been increased from 12 to 17 the appendix on atomic masses and isotope abundances has been expanded to provide tools to aid in determination of elemental composition from isotope peak intensity ratios an appendix with examples on steps to follow in the determination of elemental compositions based on isotope peak intensities has been added appendices on whether to use gc ms or lc ms third party software for use in data analysis list of information required in reporting gc ms data x 1 and x 2 peak relative intensities based on the number of atoms of carbon in an ion and list of available ei mass spectral databases have been added others such as the ones on derivatization isotope peak patterns for ions with cl and or br terms used in gc and in mass spectrometry and tips on setting up maintaining and troubleshooting a gc ms system have all been expanded and updated covers the practical instruction necessary for successful operation of gc ms equipment reviews the latest advances in instrumentation ionization methods and quantitation includes troubleshooting techniques and a variety of additional information useful for the gc ms practitioner a true benchtop reference a guide to a basic understanding of the components of a gas chromatograph mass spectrometer gc ms quick references to data interpretation ready source for information on new analyses

for drugs with a narrow therapeutic index therapeutic drug monitoring methods are essential for patient management although immunoassays are commercially available for many drugs and most laboratories use these assays for routine therapeutic monitoring they have many limitations which hinder their efficacy providing practical guidelines for imp

lipid second messengers provides detailed methodology for analysis of various lipid signaling pathways authoritative contributors explain the factors that regulate lipid second messenger production by agonist activated enzymes and examine their products topics discussed include procedures used to measure lipid derived mediators such as lysophospholipids arachidonic acid eicosanoids anandamide and ceramides and the enzymes responsible for generating these messengers such as phospholipases prostaglandin endoperoxide synthases and sphingomyelinase

three symposia on environmental geochemistry in tropical countries held in niter6i brazil 1993 in cartagena colombia 1996 and in nova friburgo brazil 1999 made it very clear that tropical geochemistry is of world standard and fast increasing in multi disciplinarily and impact on important geochemical paradigms it has additionally strong links with the economy of tropical countries such as mining and industrialisation and is in full development for treating environmental problems caused by human activities of urban or industrial origin we must compliment prof jorge abriio and his colleagues in brazil and dr gloria prieto and her colleagues in colombia for these initiatives the participation of respectively 180 and 150 scientists coming from 15 different countries for the first and second symposia has shown that a large interest exists for tropical environmental geochemistry it also demonstrates the necessity to understand

tropical environmental problems the organisation of a large international symposium is not possible without the assistance of state and federal authorities for which those of brazil and colombia have to be complimented the 3rd symposium on environmental geochemistry in tropical countries was the last of the series and was attended by 22 countries and 170 participants and treated a number of related environmental and economic problems

this text offers a comprehensive discussion of how given aroma compound classes oxygen nitrogen and sulfur are initially formed and subsequently analyzed in foods the sensory significance of these classes of aroma compounds is discussed in the context of forming the desirable and undesirable character of a food product

this work is aimed at examining persistent bioaccumulative toxic chemicals that undergo slow environmental degradation in air water and soil bioaccumulate in fish and other organisms and exhibit a high degree of toxicity this volume examines the fate and behavior of these chemicals and their food chain transfer and exposure chapters cover recent research results and reviews related to polychlorinated biphenyls pcbs butyltin toxaphene dioxin alpha hexachlorocyclohexane and mercury publisher

the aim of the 14th international mass spectrometry conference was to cover all aspects of modern mass spectrometry including its rapidly growing applications in biochemistry microbiology immunology and molecular biology over 900 scientists attended the conference and more than 650 papers were presented features of this book the articles in the 14th imsc proceedings have been divided between two media paper and cd rom the book contains 33 papers the cd rom has 300 additional papers 1 the proceedings part contains 300 papers from the oral and poster presentations 2 the cd rom contains a copy of the book portion for search purposes the conference abstract book a quicktime movie recording of the closing lecture given by professor r graham cooks the 50 minute presentation has been divided into 8 parts to make the files smaller and a pdf file with images from the congress

with the growing concern over the environment new industries and research areas have been developed to identify monitor regulate and legislate environmental interactions as well as to determine and repair existing environmental damage for both the expert and the newcomer a quick convenient and comprehensive source is needed to answer questions on the rapidly increasing amount of environmental information the encyclopedia of environmental analysis and remediation ear responds to this need by providing the reader with an in depth examination of the environmental analysis and remediation fields in a single eight volume reference source
