sustainable design for interior environments 2nd edition builds on the first edition's premise that the interior design profession has a social and moral responsibility to protect the health safety and welfare of people and the environment the text equips professors students and practitioners to design sustainable interiors by addressing leed certification environmental concerns ecosystems ethics values worldviews and the ways in which science and technology can be used to address environmental challenges through content organization and pedagogical features the book integrates complex sustainability topics directly into the design process thereby enabling readers to apply the concepts of sustainability with the same ease as they do the elements and principles of design

for students of interior design

this study focused on users emotional responses to a sustainable and a non sustainable interior environment emotional reactions toward interior environments were tested by having subjects complete a survey the survey tested users emotional reactions with a mixed methods approach by including both qualitative and quantitative questions the scope of this thesis included surveys completed by subjects in the sustainable kelley engineering center conference room number 1114 and in the non sustainable bates hall conference room number 129 both located on the oregon state university campus in corvallis oregon survey questions utilized material from mehrabian and russell's 1974 semantic differential measures of emotional state or characteristic trait emotions scale mehrabian and russell's 1974 verbal measures of approach avoidance scale and anderson's 2006 survey involving lighting thermal comfort and noise level satisfaction there were also open ended questions and a demographic

section mehrabian and russell s semantic differential measures of emotional state or characteristic trait emotions scale included only questions based on pleasure and arousal which were interpreted with russell s 1980 circumplex model in addition pleasure arousal and dominance score results were tested with a two sided paired t test the thermal comfort lighting and noise variables were tested using the wilcoxon signed rank test the findings of this research were mixed the pleasure and arousal results were significant indicating that participants rated the sustainable and non sustainable interior environments differently in addition to the results of the two sided paired t test the differences in pleasure and arousal scoring for the two interior environments were also apparent in the circumplexes the circumplex for the kelley engineering center conference room showed that many participants rated the interior positively on the pleasure axis and on the arousal axis indicating that users felt excited in the space regarding the bates hall conference room scores on the circumplex were positive on the pleasure axis but less so than in the other interior and they were negative on the arousal axis these results indicated that participants felt content in the bates hall conference room the results for dominance were not significant thermal comfort and noise were also not found to be significant the satisfaction with the lighting in the interior environments was significant indicating that participants rated the lighting of the two conference rooms differently subjects rated the kelley engineering center conference room lighting as more satisfying than the lighting in the bates hall conference room lastly qualitative responses were different for the two spaces some participants stated preference for the interior of the kelley engineering center conference room over the bates hall conference room no subjects stated preference for the bates hall conference room over the kelley engineering center conference room

sustainable design for interior environments is the first comprehensive textbook on the subject and is intended for students and instructors as well as practicing designers architects contractors and facility managers with over 150 illustrations and interactive activities the text provides a complete overview of the principles and strategies for sustainable design
