this book includes a collection of expanded papers from the 2019 sino german symposium on ai supported educational technologies which was held in wuhan china march 2019 the contributors are distinguished researchers from computer science and learning science the contributions are organized in four sections 1 overviews and systematic perspectives 2 example systems 3 algorithms and 4 insights gained from empirical studies for example different data mining and machine learning methods to quantify different profiles of a learner in different learning situations including interaction patterns cognitive modes knowledge skills interests and emotions etc as well as connections to measurements in psychology and learning sciences are discussed in the chapters

this study shows that widely used history textbooks in lebanon are more standardized and censored than in most liberal democratic countries and relatively similar in form and content to textbooks from syria and iraq a diversity of historical narratives has progressively converged into one dominant narrative which entails a standard definition of the self in contrast the other is defined through the exclusion of religious groups considered exogenous and ethnicities considered inferior in addition women are marginalized surprisingly the textbooks

affiliated with Hezbollah a Shiite militia financed by the Iranian regime depart to a certain extent from this definition while most previous research on Lebanese history textbooks has focused on the diverging narratives of religious communities this study views these textbooks as the outcome of a tension between two major forces educational traditions on the one hand and contemporary politics on the other
