sgn the ebook human anatomy multiple choice objective questions covers previous years papers of various exams with answers the ebook is very useful for medical pg entrance and recruitment exams

master s thesis from the year 2010 in the subject law comparative legal systems comparative law grade b university of auckland law faculty course climate change law language english abstract this paper deals with the linkage of international human rights and climate change it focuses on the approach to deduce legal claims in the form of compensations and concrete measures from international human rights in the course of impairments through climate change this paper shall give a short overview on the issue climate change in general including its causes effects and the current political strategies it furthermore provides a synopsis on how human rights are impaired by global warming and

climate change effects unfortunately this essay will come to the conclusion that the international human rights approach struggles with functioning as a solitary legal basis in that context and with stepping beyond the just moral implication human rights legislative potential rather lies in the development of more encompassing and more inclusive legal and political strategies human rights may advisably be instrumentalized to strengthen political debates and be used as an incitement to set up enforceable and balanced agreements on reasonable measures of equalization and support

systemic overview of gross anatomy chapters on cells and tissues histology vertebral column medical genetics an dimaging anatomy numerous carefully drawn 4 color illustrations that are easy to understand enhancing the retention of anatomical details and are simple to reproduce during examinations they follow the color scheme standardized for depicting anatomical structures tables and flowcharts that summarize the text and present complex data in a simple manner clinical correlations integrated in the text highlighting practical application of anatomical facts an approach increasingly being adopted in anatomy teaching additional information of higher academic value presented in a simple way in boxes n b to generate interest of readers especially the aspiring postgraduates important facts useful for candidates appearing in various entrance examinations like pgme usmle plab listed under golden facts to remember multiple choice questions at the end of each chapter for self assessment of the topics studied

from the most pedagogically sound organization to the exceptional art to the complete integration of the text with technology saladin has formed a teaching system that will both motivate and enable students to understand and appreciate the wonders of human anatomy

now in its 9th edition this standard text offers a regional description of the human body that is very user friendly following logical dissection sequences it provides students with all pertinent information on a region such as the upper limb in one chapter which includes its bones muscles joints blood vessels nerves etc in a compact and logical order the book is fully illustrated and includes superb color plates among the complete textbooks of human anatomy it is perhaps the most concise for this edition the authors have included a new discussion of medical imaging techniques and have added many new diagnostic images all their examples of imaging techniques are state of the art quality and are related to the normal anatomy they have also included a new section on terminology that will materially aid the student in understanding the common greek and latin prefixes suffixes and stems of anatomical terms finally they have expanded the embryology section as in all previous editions refinements have been made throughout the book in both the text and the illustrations
