Flight Catering is an authoritative guide to this specialised and vital area on the catering industry with an international team of contributions from both academia and industry. It provides a user friendly guide taking the reader through every aspect from marketing and on board service to cost control and logistics.

As the air travel industry begins to emerge from the COVID-19 restrictions, new research must be undertaken to survey the changing business landscape. This book examines existing air travel literature, illustrates the current theories in the field and suggests research methods for integrating them in fieldwork. The book begins by surveying the landscape of air travel research and examining key theoretical frameworks such as grounded theory, institutional theory, prospect theory and the theory of planned behavior. It then explores when qualitative and quantitative research methods are appropriate for use in air travel research and how they can be applied successfully. Gathered contributors from Southeast Asia and the Middle East highlight some of the latest issues including the impacts of COVID-19 on airfreight, airline catering and passenger perceptions of security and safety. Future directions for research are also proposed. This book will appeal to researchers and postgraduate students in the fields of air transport or aviation management, tourism, marketing and consumer behavior.

From the John Holmes Library Collection

The first and only comprehensive guide to the field of inflight catering management. Inflight catering has over the past thirty years evolved into a distinct branch of the noncommercial foodservice industry, complete with its own unique set of equipment, preparation, storage, disposal and distribution requirements. Yet until now there were no books devoted exclusively to the needs of foodservice management professionals and students interested in pursuing a career in this fascinating and highly lucrative field. This book fills that gap, written with the full support and cooperation of the Inflight Food Service Association's Education Committee. Inflight Catering Management is both a valuable professional resource and an excellent text for noncommercial foodservice management courses. It provides comprehensive coverage of all essential aspects of contemporary inflight foodservice operations, including bidding, contract management and the airline caterer interface; caterers' equipment and facilities; onboard equipment and facilities; quality assurance; food safety and sanitation; waste management; current and future career opportunities.

Civil Aviation Standards and Liabilities examines operational standards and obligations and investigates the consequences and failure to comply with them, utilising source material from major treaties such as the Chicago Convention on Civil Aviation 1944 and its key ICAO annexes. Key features of the ICAO Convention signed at Montreal in 1999 including carrier liability for passenger bodily

injury or death are also considered the text also examines the changing nature of civil aviation in europe and highlights the advent of the joint aviation authority jaa and the increasing application of the joint aviation requirements jars paying particular attention to their effect upon flight crew training procedures the book also investigates topics found in international aviation litigation as well as risk management aviation insurance and product liability

sets out standards for defining transactor type statistical units for use in the compilation of statistics used for measuring economic activity
