Janeway's Immunobiology is a textbook for students studying immunology at the undergraduate, graduate, and medical school levels. As an introductory text, all students will appreciate the book's clear writing and informative illustrations, and advanced students and working immunologists will appreciate its comprehensive scope and depth.

Immunobiology is the premier text for immunology at the advanced undergraduate, graduate, and medical school levels. Beginning students appreciate the book's clear writing and informative illustrations, while advanced students and working immunologists value its comprehensive scope. Every chapter is reviewed with experts to ensure accuracy, authority, currency, and depth. The tenth edition is supported by Inquisitive, Norton's award-winning, easy-to-use adaptive learning tool that helps students learn immunological terms and apply them conceptually.

Case Studies in Immunology, seventh edition, is intended for medical students and undergraduate and graduate students in immunology. It presents major topics of immunology through a selection of clinical cases that reinforce and extend the basic science. Each case history is preceded by essential scientific facts about the immunological mechanisms.

Case Studies in Allergic Disorders is designed for undergraduate and graduate students in immunology, medical students, and resident physicians. It describes the basic cellular and molecular mechanisms involved in the pathogenesis of commonly occurring allergic diseases and introduces the rationale for targeted treatment of allergy, replicating the successful approach of Case Studies in Immunology. The book presents mechanisms of hypersensitivity through a selection of clinical cases that reinforce and extend the basic science. The cases are largely drawn from the records of Children's Hospital Boston, linking the discussion of pathogenesis to actual clinical presentation. It establishes important connections between the bench and bedside. The book can be used as either a stand-alone text or as a companion to Janeway's Immunobiology and The Immune System.

This book presents a case history of a patient with a mixed essential cryoglobulinemia to illustrate essential points about the mechanisms of immunity and to explain some of the immunological problems often seen in the clinic. It is helpful for medical and
