armed conflict and military activities have serious adverse impacts on the environment modern weaponry troop movements landmines hazardous military waste and the destruction of forests for military use are a few sources of harm to the environment both during armed conflict and peacetime military activities ecological assaults in combat areas are often kept a secret by the government resulting in even greater humanitarian and environmental harm environmental degradation is increasingly

being recognized as one of the most significant challenges of the 21st century and its effects are being felt worldwide both domestic and international legislations have been inadequate in mitigating the impact of military activities this book provides details of the environmental destruction wreaked during international and non international armed conflicts and argues that the existing legal regime for the protection of the environment during armed conflict requires substantial modification it puts forward the view that though it is inconceivable to impose an absolute ban on environmental damage during military operations strengthening and clarifying the existing laws protecting the environment in times of conflict and enforcing environment friendly practices among military forces could go a long way in protecting natural assets of our earth

in recent times the devastation occurring in places like darfur has focused the world s attention on the intertwined relationship of military conflict and the environment and the attendant human suffering in war and the environment eleven scholars explore among other topics the environmental ravages of trench warfare in world war i the exploitation of philippine forests for military purposes from the spanish colonial period through 1945 william tecumseh sherman s scorched earth tactics during his 1864 65 march to the sea and the effects of wartime policy upon u s and german conservation practices during world war ii

the indian air force from a humble beginning in 1932 with 4 wapiti aircraft six indian officers and 22 hawaii sepoys have traversed a long journey of eighty one years and crossed noteworthy milestones to become the fourth largest air force in the world while facing several limitations challenges iaf have met all the national defence requirements and made several strategic contributions with growing economic interests and national aspirations expanding interests well beyond our territorial boundaries and prevailing internal security challenges india s national defence requirements are also increasing the first gulf war was a monumental turning point in the war time employment of aerospace power ever since significance of aerospace power in war crisis and peace time has been gaining ascendancy kosovo and libya are the two pertinent examples of the allies virtually relying on aerospace power without committing any soldiers on the ground scrutiny of the emerging global and national trends suggests that employment of the aerospace assets as well as nation s expectation from the iaf will continue to rise alongside there is an unplanned fall in flying platforms weapon systems and pilot strength of the iaf this study is an attempt to analyse the history of the iaf in war as well as other than war operations to appreciate the emerging trends in geopolitics aerospace technology and doctrine and to identify the likely challenges iaf would be facing in the next two decades and beyond road map for transformation of the national security framework indigenous aerospace industry and the iaf has also been suggested

the environmental devastation caused by military conflict has been witnessed in the wake of the vietnam war the gulf war and the kosovo conflict this book brings together leading international lawyers military officers scientists and economists to examine the legal political economic and scientific implications of wartime damage to the natural environment and public health the book considers issues raised by the application of humanitarian norms and legal rules designed to protect the environment and the destructive nature of war contributors offer an analysis and

critique of the existing law of war framework lessons from peacetime environmental law means of scientific assessment and economic valuation of ecological and public health damage and proposals for future legal and institutional developments this book provides a contemporary forum for interdisciplinary analysis of armed conflict and the environment and explores ways to prevent and redress wartime environmental damage

explores the ways environmental issues may lead to international conflict and identifies strategies that might head off potential conflict

the chapters in this volume have their origins in papers presented at a workshop held at lund university in sweden the workshop gathered together experts from europe the united states and australia including leading academics as well as representatives from the icrc the swedish norwegian and danish red cross societies and the swedish and norwegian governments to examine the relevance and adequacy of the existing regime for environmental protection during armed conflict as well as the ability of other international legal mechanisms to contribute to the amelioration of damage to the environment arising as a result of or in relation to armed conflict the book like the workshop takes as its starting point the existing ihl regime for the protection of the environment during armed conflict and goes on to explore the application of other legal regimes that may be relevant to protection of the environment both during armed conflict and as in the broader context envisaged by the ilc in relation to armed conflict as this thought provoking volume demonstrates a vast range of issues actors and legal regimes must now be considered and some pro active and imaginative research and thinking brought to bear in any consideration of this ever important topic some papers appeared previously in a special issue of the nordic journal of international law

acts perpetrated during the course of warfare have through the ages led to significant environmental destruction these have included situations where the natural environment has intentionally been targeted as a victim or has somehow been manipulated to serve as a weapon of warfare until recently such acts were generally regarded as an unfortunate but unavoidable element of armed conflict despite their potentially disastrous impacts the existing international rules have largely been ineffective and inappropriate and have in practical terms done little to deter deliberate environmental destruction particularly when measured against perceived military advantages however as the significance of the environment has come to be more widely understood and recognised this is no longer acceptable particularly given the ongoing development of weapons capable of widespread and significant damage this book therefore examines the current international legal regime relevant to the intentional destruction of the environment during warfare and argues that such acts should in appropriate circumstances be recognised as an international crime and should be subject to more effective rules giving rise to international criminal responsibility it also suggests a framework within the rome statute of the international criminal court as to how this might be achieved the purpose of international law has developed far beyond regulating relations between states and has increasingly extended to prohibit conduct or activities with very harmful effects to the international community as a whole and on individuals one such prohibited conduct is the intentional and wanton destruction to the natural environment during armed conflict

professor freeland in this book has painstakingly and in a sophisticated manner recommended how individuals committing such a crime could be brought within the jurisdiction of the international criminal court in the hague it is highly recommended abdul g koroma former judge international court of justice whilst international law has made significant strides in regulating the conduct of armed conflict there is increasing concern about the environmental impacts of warfare deliberate environmental destruction can have devastating effects on present and future generations yet in terms of international criminal law there has been relatively little by way of progress to deter such acts this book is therefore extremely timely and presents a comprehensive and thought provoking perspective as to why and how this concern could be addressed with its insightful analysis the book will undoubtedly stimulate further debate in this area and is highly recommended to all those concerned with the impact of armed conflict on the natural environment erkki kourula judge international criminal court appeals chamber steven freeland argues in favor of adding crimes against the environment to international law and to the jurisdiction of the international criminal court his writing is pragmatic skillful and also full of heart his is the most convincing argument for a proposition well ahead of its time his book is a must read freeland s research is compendious his view clear eyed and his style gifted freeland s book however transcends environmental protection he is among the fore runners when it comes to thinking creatively about the sources of violence insecurity and instability in the international order yet all the while he retains the wisdom not to posit law as rapture saving us from collective rupture mark a drumbl class of 1975 alumni professor of law and director of the transnational law institute washington and lee university

the inherent dangers of war zones constrain even the most ardent researchers with the consequence that little has been known for certain about the effects of war on stable environments war and nature sifts through the available data from past wars to evaluate the actual impact that combat has on natural surroundings examining conflicts of various kinds the long war in tropical vietnam the relatively brief and highly technical wars in the persian gulf and various civil wars in africa and south central asia fought with small arms brauer asks whether differences in technology location and duration are critical in causing environmental and humanitarian harm a number of unexpected conclusions are drawn from this data including practical agendas for collecting scientific evidence in future wars and suggestions about what the world s environmental and conservation organizations can do one thing war and nature does is to show us how globalization can be a force harnessed for good ends

this timely study examines how the environmental impact of modern warfare violates fundamental principles of international environmental and humanitarian laws and why these consideration need to be included in rules of armed conflict if direct attacks on innocent civilians are universally recognized as unacceptable then environ mental devastation of their habitat by acts of war must also be recognized as an unacceptable consequence of armed conflict the author presents the case that the international community understand its responsibility to curb environ mental consequences of modern weaponry and incorporate environmental concerns into the conventions regulating armed conflict published under the transnational publishers imprint

this report inventories and analyses the range of international laws that protect the environment during armed conflict with a view to identifying the current gaps and weaknesses in this system the authors examine the relevant provisions within four bodies of international law environmental humanitarian ihl international criminal law icl international environmental law iel and international human rights law hrl the report concludes with twelve concrete recommendations on ways to strengthen this legal framework and its enforcement the environment and natural resources are crucial for building and consolidating peace it is urgent that their protection in times of armed conflict be strengthened there can be no durable peace if the natural resources that sustain livelihoods are damaged or destroyed this report provides a basis upon which member states can draw upon to clarify expand and enforce international law on environmental protection in times of war

since the 1960s the environment has become an issue of increasing public concern in north america and elsewhere triggered by the second indochina war vietnam conflict of 1961 1975 and further encouraged by the international conference on the human environment held in stockholm in 1972 the environmental impact of war emerged and grew as a topic of research in the natural and the social sciences and in the late 1980s this led additionally to a focus and debate on environmental security arthur westing a forest ecologist was a major pioneer contributing and framing both of those debates conceptually theoretically and empirically starting with harvest of death chemical warfare in vietnam and cambodia 1972 co authored with wildlife biologist e w pfeiffer and others as a senior researcher at the stockholm and oslo international peace research institutes sipri and prio and as a professor of ecology at windham and hampshire colleges westing authored and edited books on ecological consequences of the second indochina war 1976 weapons of mass destruction and the environment 1977 warfare in a fragile world military impact on the human environment 1980 herbicides in war the long term ecological and human consequences 1984 environmental warfare a technical legal and policy appraisal 1984 explosive remnants of war mitigating the environmental effects 1985 global resources and international conflict environmental factors in strategic policy and action 1986 cultural norms war and the environment 1988 comprehensive security for the baltic an environmental approach 1989 and environmental hazards of war releasing dangerous forces in an industrialized world 1990 as well as authoring numerous un reports book chapters and journal articles this volume combines six of his pioneering contributions on the environmental consequences of warfare in viet nam and in kuwait on the environmental impact of nuclear war and on legal constraints and military guidelines for protecting the environment in wartime

this book explores the interplay between war and environment in henan province a hotly contested frontline territory that endured massive environmental destruction and human disruption during the conflict between china and japan during world war ii in a desperate attempt to block japan s military advance chinese nationalist armies under chiang kai shek broke the yellow river s dikes in henan in june 1938 resulting in devastating floods that persisted until after the war s end greater catastrophe struck henan in 1942 3 when famine took some two million lives and displaced millions more focusing on these war induced disasters and their aftermath this book conceptualizes the ecology of war in terms of energy flows through and between militaries societies and environments ultimately micah muscolino argues that efforts to procure and

exploit nature's energy in various forms shaped the choices of generals the fates of communities and the trajectory of environmental change in north china

this book first published in 1980 examines the extent to which warfare and other military activities contribute to environmental degradation the military capability to damage the environment has escalated the military use and abuse of each of the several major global habitats temperate tropical desert arctic insular and oceanic are evaluated separately in the light of the civil use and abuse of that habitat
