updated to include technological and process developments in heat transfer refrigeration compression and compression surge drums this text emphasises how to apply techniques of process control and how to interpret results into equipment details

this latest edition covers the technical performance and mechanical details of converting the chemical and petrochemical process into appropriate hardware for distillation and packed towers it incorporates recent advances and major innovations in distillation contacting devices and features new generations of packing in addition this new edition reflects the significant progress that has been made in process design techniques in recent years volume 2 s example calculation techniques guide in the preparation of preliminary and final

rating designs in some instances the book includes manufacturers procedures and notes clearly indicate when manufacturers should verify results covers distillation and packed towers and contains material on azeotropes and ideal and non ideal systems includes important findings from recent literature to illustrate alternate design methods new illustrations and rating charts

a user friendly 2nd edition of the classic guide to building and decorating boxes of artisan quality learn all the steps necessary to make a variety of colorful decorative useful boxes created from book board and covered with decorative papers and book cloth nearly 300 color photos illustrate every step needed to make hinged lid clamshell and creative boxes necessary tools and materials are discussed in detail and essential formulas are provided for each box type discussed basic skills necessary for the successful production of any box are also explored including determining grain direction pattern layout cutting materials covering book board with paper or book cloth and gluing also provided are box making resources a useful glossary of terms and an appendix featuring measurement conversions this 2nd edition includes a brand new chapter on divided boxes as well as additional creative box examples to further inspire you as you explore the craft

this textbook is targeted to undergraduate students in chemical engineering chemical technology and biochemical engineering for courses in mass transfer separation processes transport processes and unit operations the principles of mass transfer both diffusional and convective have been comprehensively discussed the application of these principles to separation processes is explained the more common separation processes used in the chemical industries are individually described in separate chapters the book also provides a good understanding of the construction the operating principles and the selection criteria of separation equipment recent developments in equipment have been included as far as possible the procedure of equipment design and sizing has been illustrated by simple examples an overview of different applications and aspects of membrane separation has also been provided humidification and water cooling necessary in every process industry is also described finally elementary principles of unsteady state diffusion and mass transfer accompanied by a chemical reaction are covered salient features a balanced coverage of theoretical principles and applications important recent developments in mass transfer equipment and practice are included a large number of solved problems of varying levels of complexities showing the applications of the theory are included many end chapter exercises chapter wise multiple choice questions an instructors manual for the teachers

the routledge international handbook of sandplay therapy provides a comprehensive overview of this therapeutic method developed to provide a means of helping clients of all ages with mental suffering the contributors from a range of therapeutic and cultural backgrounds demonstrate core theory and practice and explore the implications of current neuroscientific research the chapters illustrate the effectiveness of this seemingly simple psychotherapeutic tool in its contemporary applications split into six parts this handbook considers sandplay therapy in medicine sandplay with special populations sandplay in analysis and general practice adaptions of the sandplay method in education sandplay and the spirit non jungian uses of the sand tray in therapeutic applications unique in scope and breadth this handbook will appeal to academics and students of jungian psychotherapy as well as occupational therapists art and play therapists and all clinicians using sandplay therapy as part of their professional practice

hazardous waste management is a complex interdisciplinary field that continues to grow and change as global conditions change mastering this evolving and multifaceted field of study requires knowledge of the sources and generation of hazardous wastes the scientific and engineering principles necessary to eliminate the threats they pose to people and the environment the laws regulating their disposal and the best or most cost effective methods for dealing with them written for students with some background in engineering this comprehensive highly acclaimed text does not only provide detailed instructions on how to solve hazardous waste problems but also guides students to think about ways to approach

these problems each richly detailed self contained chapter ends with a set of discussion topics and problems case studies with equations and design examples are provided throughout the book to give students the chance to evaluate the effectiveness of different treatment and containment technologies
