excerpt from new complete geography we have decided to teach these features objectively on a plan that has been highly commended for instance instead of devoting two or three pages of text to the origin of mountains a subject in which the average child takes no interest we give in the general presentation of the physical geography of the earth four pictures of mountains and under each picture give a brief description of the origin and character of the formation the same course has been followed with reference to other physical features the pupil will read these descriptions because of his interest in the picture and will remember them for life because of their association with it commercial and industrial geography a leading feature of this book is the treatment of industrial and commercial geography in actual life it is a knowledge of the countries of the earth and of the people who inhabit them of their resources and industries their cities and commercial relations that one needs for practical business purposes or even for an intelligent appreciation of the contents of the daily newspapers industrial illustrations in carrying out this plan we have been engaged for three years past in collecting from all parts of the world industrial pictures photographs showing machinery in actual operation and under these we have placed captions which give in a few words a clear idea of the process of manufacture we have distributed these throughout the book in such a way as to identify each industry with some state or country where it is especially prominent we believe that this plan will awaken present interest and prove of permanent value about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

excerpt from complete geography commerce a work on geography that seeks to lay a broad basis for the study of nations must throw a strong search light upon their commercial relations commerce and the related industries take a leading place in this book those of our own country being illustrated by twenty two colored maps prepared expressly for this work the intelligent study of a country s natural resources must be based on knowledge of its physical features for this reason the surface forms and the climate of the various parts of the world receive full treatment in the text the maps and the pictures the natural regions of the united states are made to serve as a basis for the comparative study of other lands order of lessons though most teachers using this book will doubtless present the lessons in the order in which they appear yet those who wish to complete the study of the united states in detail before showing the broader relations of our country to other lands can readily do so the work is so arranged that pupils can go directly from the early lessons on the physical features and resources of our country pages 30 to 52 to the study of its people its government and its industries pages 123 et seq about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

excerpt from a complete geography in the plan of this volume the authors have left the beaten track to such an extent that some words of explanation seem in place general geography probably the most difficult part of the geography for grammar school grades is that dealing with seasons winds rainfall temperature etc it ordinarily occupies a considerable number of pages at the beginning of the larger book and follows immediately upon primary geography this arrangement requires pupils to spring from a meagre study of simple concrete facts to the highest abstractions in the entire subject and what makes the matter worse these broad abstractions are usually only very briefly stated the authors of this volume have followed a different plan only three chapters at the beginning of the book precede the intensive treatment of the united states the first is a physiographic history of the continent showing how its principal mountain ranges and valleys came into existence how its coal beds were formed what were the effects of the great ice age and what have been the more recent changes in the coast line with their results then comes a chapter on the plants animals and peoples of north america and following that is a treatment of latitude and longitude only so much is presented before taking up the united states

because that is all that seems really necessary whatever further facts have been needed for north america in regard to seasonal changes winds etc have been plainly stated when wanted just as other concrete facts have been after our continent is finished and a fair number of concrete data bearing on these matters has been collected these topics themselves are treated in much detail by this arrangement the study of these difficult subjects has been postponed one year and they are then approached somewhat inductively the authors regard this as one of the most important among their proposed changes in method about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
