all researchers want to produce interesting and influential theories a key step in all theory development is formulating innovative research questions that will result in interesting and significant research traditional textbooks on research methods tend to ignore or gloss over actual ways of constructing research questions in this text alvesson and sandberg develop a problematization methodology for identifying and challenging the assumptions underlying existing theories and for generating research questions that can lead to more interesting and influential theories using examples from across the social sciences established methods of generating research questions in the social sciences tend to focus on gap spotting which means that existing literature remains largely unchallenged the authors show the dangers of conventional approaches providing detailed ideas for how one can work through such problems and formulate novel research questions that challenge existing theories and produce more imaginative empirical studies constructing research questions is essential reading for any researcher looking to formulate research questions that are interesting and novel

the research methods knowledge base is a comprehensive textbook that addresses all of the topics in a typical introductory undergraduate or graduate course in social research methods it covers the entire research process including formulating research questions sampling probability and nonprobability measurement surveys scaling qualitative unobtrusive research design experimental and quasi experimental data analysis and writing the research paper it also addresses the major theoretical and philosophical underpinnings of research including the idea of validity in research

reliability of measures and ethics the knowledge base was designed to be different from the many typical commercially available research methods texts it uses an informal conversational style to engage both the newcomer and the more experienced student of research the web based version of this book is a fully hyperlinked text that can be integrated easily into an existing course structure or used as a sourcebook for the experienced researcher who simply wants to browse
