functionalized nanomaterials have extremely useful properties which can outperform their conventional counterparts because of their superior chemical physical and mechanical properties and exceptional formability they are being used for the development and innovation in a range of industrial sectors however the use of functionalized nanomaterials is still in its infancy in many industrial settings functionalized nanomaterials have the potential to create cheaper and more effective consumer products and industrial processes however they also could have adverse effects on the environment human health and safety and their sustainability is questionable if used incorrectly this book discusses the opportunities and challenges of using functionalized nanomaterials in a variety of major industrial sectors handbook of functionalized nanomaterials for industrial applications provides a concise summary of the major applications of functionalized nanomaterials in industry today it covers the enhancements in industrial techniques and processes due to functionalized nanomaterials showing how they substantially improve the performance of existing procedures and how they can deliver exciting consumer products more cheaply emphasis is given to greener approaches leading to more sustainable products and devices the legal economical and toxicity aspects of functionalized nanomaterials are also discussed in detail highlights established industrial applications of functionalized nanomaterials and discusses their future potential for a range of industrial sectors discusses how functionalized nanomaterials are being used to create new types of commercial products and devices assesses the challenges of using functionalized nanomaterials in industry setting out major safety and regulatory challenges

this book contains the description of machines and systems as investments goods in production these machines have a technological and economical life cycle over the time used by explaining the paradigms of life cycle management the book describes how the life cycle of such investment goods can be designed operated and optimized to deliver maximum benefit in industrial environment additional examples from industry including case studies and calculations demonstrate practical applications and deliver benefit not only for academic or educational purpose but also for industrial practitioners

this book combines elementary theory from computer science with real world challenges in global geodetic observation based on examples from the geodetic observatory wettzell germany it starts with a step by step introduction to developing stable and safe scientific software to run successful software projects the use of software toolboxes is another essential aspect that leads to the application of generative programming an example is a generative network middleware that simplifies communication one of the book s main focuses is on explaining a potential strategy involving autonomous production cells for space geodetic techniques the complete software design of a satellite laser ranging system is taken as an example such automated systems are then combined for global interaction using secure

communication tunnels for remote access the network of radio telescopes is used as a reference combined observatories form coordinated multi agent systems and offer solutions for operational aspects of the global geodetic observing system ggoss with regard to industry 4.0

environmental awareness is driven mainly by the scarcity of natural resources and by more strict legal regulations the modern enterprise policy should look at the relations between economic actions and ecological consequences ecoproduction is a new business approach which focuses on the most efficient and productive use of raw materials and natural resources in order to minimize footprints on the natural environment this book aims to provide the state of the art as well as new ideas of the environmental conscious operations management the contributors present in the individual chapters problems related to eco friendly production technologies recycling and waste reduction scope of topics discussed in this book covers also pollution prevention energy efficiency the authors describe problems of information management in complex systems
