governments the world over want to spend more on infrastructure the benchmark for developing countries is 7.8% of gdp per annum to lay the foundation for sustained and inclusive growth india is no exception it realizes that more needs to be spent on infrastructure for the country to regain its position as the fastest growing large economy in the world while india spent about 7.2% of its gdp on infrastructure during the eleventh plan period 2008-12 this number has recently come down to approximately 5% the backdrop of the book is the ambitious national infrastructure plan nip the task force report on the nip was finalized in april 2020 since infrastructure investment is crucial to faster and inclusive growth it is timely that the nip is actioned now given that the indian economy contracted to 7.3% in the financial year 2020-21 this book discusses various aspects of infrastructure financing

in detail with a major section devoted to green financing of infrastructure

many of our global cities are distressed and facing a host of issues economic collapse in the face of rising expectations social disintegration and civil unrest and ecological degradation and the threats associated with climate change including more frequent and more severe natural disasters our long held assumptions about man and nature and how they interact are defunct we realize now that we can no longer continue to build without addressing the long term impacts of our actions and their spillovers energy and natural resources are finite the way we configure economies has come into question in the developed world especially in the united states infrastructure and the notions that underpin it are outdated meanwhile the developing world is experiencing major rapid transformations in lifestyles and economies that are affecting billions of people and requiring a whole new way of planning human settlements cities are the key to our future they represent the most effective vehicle for positive advancements in the human condition and environmental change this volume argues for the need to redesign and re plan our cities in holistic ways that reflect our new understanding and relate to their diversity and multi dimensionality presenting a range of case studies from around the world this volume examines how these distressed cities are dealing with these issues in planning for their future alongside these empirical chapters are philosophical essays that consider the future of distressed cities bringing together a team of leading scholars united nations agencies non governmental organizations private consulting firms international organizations and foundations and policy officials this volume provides a unique and comprehensive overview on how to transform distressed communities into more livable places

this book explains and outlines the use of hierarchical abstraction for project development the author details the need for effective strategies for project development and provides a thorough explanation of hierarchical abstraction the book instructs readers on how they may apply this method of organizing information or concepts into a layered structure in order to make ideas more manageable the author then explains how this process also simplifies the representation and analysis of information allowing readers to extract meaning and identify relationships within a system the book shows how hierarchical abstraction can also be implemented for more effective disbursement of information the author includes extensive discussion of the applications for a variety of fields including computer science information architecture and cognitive psychology

landscape protection management and planning entail rights and responsibilities for everyone the council of europe landscape convention aims to promote the protection management and planning of landscapes and to organise international co operation
