an immensely useful manual with many attractive features comprehensive and lucid keys precise diagrams annotated checklists and up to date references there is no doubt that it should be seen as an example of the type of manual which is so badly needed in the study of the fauna of many shores around the world journal of animal ecology congratulations to the editors contributors and publisher for a job well done the third edition has been rewritten corrected and enlarged so that while retaining the basic organization of the earlier ones it is more useful informative and up to date the meticulous scholarship of smith and carlton is just what the revision needed systematic zoology this revision should serve for many years it is therefore particularly commendable that the editing has been meticulous perhaps flawless thanks are due to the many contributors for a job well done the quarterly review of biology as the pacific coast intertidal zone undergoes increasingly profound changes knowing the sentinel invertebrates can foretell the future of the sea and hence of our species jim carlton s hefty new update of the light smith manual the comprehensive compendium of who s who between the tides is the best and quickest way to do so elliot a norse president marine conservation biology institute this much anticipated modernization of light s manual is an astonishing accomplishment blending state of the art taxonomy with profusely illustrated and user friendly keys to who s whom on marine shores from its stated boundaries of mid california through oregon and clearly much further north it s also an

informative well referenced read marine biologists should not leave home without it robert paine professor emeritus of biology university of washington at this time of environmental change and loss of biodiversity species identification has never been more important the fourth edition of light and smith is more than just a field guide it is a masterwork of research and description with a strong focus on morphological detail no other book has such a broad scope newly expanded to include even the most obscure taxa the revised keys and beautiful anatomical illustrations make this classic guide more indispensable than ever as taxonomists become extinct there are fewer students to receive the vast body of knowledge accumulated by generations of careful study i hope that the beauty and depth of this guide will inspire a generation of young scientists to continue this critical taxonomic work it will have a place of honor in all marine labs paul k dayton scripps institution of oceanography
