this book explores the ethics of national security intelligence institutions operating in contemporary liberal democracies intelligence collection by agencies such as the cia mi6 and mossad involves practices that are apparently inconsistent with the principles of ordinary morality practices such as lying spying manipulation and covert action however in the defence of national security such practices may not only be morally permissible but may also under some circumstances be morally obligatory one approach to the ethics of national security intelligence activity has been to draw from the just war tradition so called just intelligence theory this book identifies significant limitations of this approach and offers a new institutionally based teleological normative framework in doing so it revises some familiar principles designed for

application to kinetic wars such as necessity and proportionality and invokes some additional ones such as reciprocity and trust it goes on to explore the applications of this framework and a revised set of principles for national security intelligence institutions and practices in contemporary and emerging political and technological settings this book will be of much interest to students of intelligence studies ethics security studies and international relations

this edited volume brings together many of the world's leading scholars of intelligence with a number of former senior practitioners to facilitate a wide ranging dialogue on the central challenges confronting students of intelligence the book presents a series of documents nearly all of which are published here for the first time accompanied by both overview and commentary sections the central objectives of this collection are twofold first it seeks to build on existing scholarship on intelligence in deepening our understanding of its impact on a series of key events in the international history of the past century further it aims to explore the different ways in which intelligence can be studied by bringing together both scholarly and practical expertise to examine a range of primary material relevant to the history of intelligence since the early twentieth century this book will be of great interest to students of intelligence strategic and security studies foreign policy and international history

this unique book captures state of the art thinking and methodologies designed to advance intelligence education to produce a capable and qualified intelligence workforce intelligence is evolving because it must keep pace with the many wicked threats that face open democracies public health threats such as the covid 19 pandemic threats emanating from regional instabilities from climate change cyber based threats from artificial intelligence and the spread of disinformation have all shown how traditional intelligence education must evolve tomorrow's workforce simply needs better education and training which arguably are better provided by institutions of higher education that have the capacity and time to do it appropriately while some on the job training will always be required and while the profession will always need specialists in linguistics engineering sociology international relations religious studies and the like it is increasingly obvious that the role of a degree in intelligence studies has never been more important to the intelligence community and by extension to the peace and civility of the world put simply intelligence education is critical to preserving democracy this book will be of great interest to all students scholars and practitioners of intelligence studies data science literacy and machine learning ethics security studies foreign policy and international relations the chapters in this book were originally published as a special issue of journal of policing intelligence and counter terrorism

this handbook provides a detailed analysis of threats and risk in the international system and of how governments and their intelligence services must adapt and function in order to manage the evolving security environment this environment now and for the foreseeable future is characterised by complexity the development of disruptive digital technologies the vulnerability of critical national infrastructure asymmetric threats such as terrorism the privatisation of national intelligence capabilities all have far reaching implications for security and risk management the leading academics and practitioners who have contributed to this handbook have all done so with the objective of cutting through the complexity and providing insight on the most pressing security intelligence and risk factors today they explore the changing nature of conflict and crises interaction of the global with the local the impact of technological the proliferation of hostile ideologies and the challenge this poses to traditional models of intelligence and the impact of all these factors on governance and ethical frameworks the handbook is an invaluable resource for students and professionals concerned with contemporary security and how national intelligence

must adapt to remain effective

centuries ago sun tzu wrote know the enemy as you know yourself the urgency of this maxim is even greater today a commander who boldly determines without knowledge of the enemy or the battleground to close tit the doe and destroy him wherever he might be is like a boxer who is in the ring blindfolded this book is written primarily for commanders because intelligence is for commanders intelligence is not an academic exercise nor is it an end in itself the prime purpose of intelligence is to help the commander make a decision and thereby to proceed more accurately and more confidently with the accomplishment of his mission on the military intelligence branch history reading list 2012

this collection of articles is by experts in the field who are convinced that intelligence has an important role to play not only in times of war and confrontation but also in times of conciliation and political processes

internationally the profession of intelligence continues to develop and expand so too does the academic field of intelligence both in terms of intelligence as a focus for academic research and in terms of the delivery of university courses in intelligence and related areas to a significant extent both the profession of intelligence and those delivering intelligence education share a common aim of developing intelligence as a discipline however this shared interest must also navigate the existence of an academic practitioner divide such a divide is far from unique to intelligence it exists in various forms across most professions but it is distinctive in the field of intelligence because of the centrality of secrecy to the profession of intelligence and the way in which this constitutes a barrier to understanding and openly teaching about aspects of intelligence how can co operation in developing the profession and academic study be maximized when faced with this divide how can and should this divide be navigated the academic practitioner divide in intelligence provides a range of international approaches to and perspectives on these crucial questions
