cavadino and dignan's *Penal Systems: A Comparative Approach* looks across national boundaries to see how penal systems differ and why. It is hands down the most comprehensive and up to date book on the subject and should become a staple textbook for use in law and social science courses on comparative penal policy and practice. Michael H. Tonry, University of Minnesota. This book is an important addition to the literature on punishment. It is a highly readable and very well researched overview of some of the major differences in punitiveness between neo liberal corporatist and social democratic countries. This is a major contribution to comparative penology by two of the leading authors in this field. Alison Liebling, Director of the Prisons Research Centre, UK. A major and seminal work. David Downes, Professor Emeritus at the London School of Economics. *Penal Systems: A Comparative Approach* is a comprehensive and original introduction to the comparative study of punishment. Analysing twelve countries, Cavadino and Dignan offer an integrated and theoretically rigorous approach to comparative penology. They draw upon material provided by a team of eminent penologists to produce an important and highly readable contribution to scholarship in this area. Early chapters introduce the reader to comparative penology, set out the theoretical framework and consider whether there is currently a global penal crisis. Each country is then discussed in turn. Chapters on comparative youth justice and the privatization of prisons follow. Comparisons between countries are drawn within each chapter, giving the reader a synoptic and truly comparative vision of penalty in different jurisdictions.

Economic development and urban growth are the contested grounds of urban politics. Business elites and politicians tend to forge pro growth coalitions centered around downtown development, while progressive and neighborhood activists counter with a more balanced approach that features a strong neighborhood component. Urban politics is often shaped by this conflict, which has intellectual as well as practical dimensions. In some cities, neighborhood interests have triumphed; in others, the pro growth agenda has prevailed. In this illuminating comparative study, Barbara Ferman demonstrates why neighborhood challenges to pro growth politics were much more successful in Pittsburgh than they were in Chicago. Operating largely in the civic arena, Pittsburgh's neighborhood groups encountered a political culture and institutional structure conducive to empowering neighborhood progressivism in housing and economic development policymaking. In contrast, the pro growth agenda in Chicago was challenged in the electoral arena, which was dominated by machine ward based politicians.

who regarded any independent neighborhood organizing as a threat consequently neighborhood demands for policymaking input were usually thwarted besides revealing why the development policies of two important american cities diverged ferman s unique comparative approach to this issue significantly expands the scope of urban analysis among other things it provides the first serious study to incorporate the civic sector neighborhood politics as an important component of urban regimes ferman also emphasizes institutional and cultural factors often ignored or relegated to residual roles in other studies and expounds on their influence in shaping local politics and policy to add an analytical and normative dimension to urban analysis she focuses on the non elite actors not just the economic and political elites who compose governing coalitions ultimately ferman takes a more holistic and balanced view of large cities than is typical for urban studies as she argues that neighborhoods are an important integral part of what cities are and can be for that reason especially her work will have a profound impact upon our understanding of urban politics
