in this provocative study economist ernesto screpanti argues that imperialism is far from disappearing or mutating into a benign form of globalization. It has in fact entered a new phase which he terms global imperialism. This is a phase defined by multinational firms cut loose from the nation state framework and free to chase profits over the entire surface of the globe no longer dependent on nation states for building a political consensus that accommodates capital accumulation. These firms seek to bend governments to their will and destroy barriers to the free movement of capital and while military force continues to play an important role in imperial strategy it is the discipline of the global market that keeps workers in check by pitting them against each other no matter what their national origin. This is a world in which the so called labor aristocracies of the rich nations are demolished the power of states to enforce checks on capital is sapped and global firms are free to pursue their monomaniacal quest for profits unfettered by national allegiance. Screpanti delves into the inner workings of global imperialism explaining how it is different from past forms of imperialism how the global distribution of wages is changing and why multinational firms have striven to break free of national markets. He sees global imperialism as a developing process one with no certain outcome but one thing is clear when economic crises become opportunities to discipline workers and when economic policies are imposed through increasingly authoritarian measures the vision of a democratic and humane world is what is ultimately at stake.

Voting and elections may often be cited as the most entertaining aspect of political theatre however it is the arena of public policy that has the most direct impact on the lives of the citizenry and as we have seen played out in recent debates over healthcare reform policy changes can be dramatic sweeping and often hotly contested. Known for providing a trusted and comprehensive overview of the policy process, Guy Peters returns with the ninth edition of *American Public Policy: Promise and Performance Beyond Walking Students Through the Governmental Structures and Policy Making Procedures*. Peters efficiently covers a wide swath of policy areas and then concludes with a look at both cost benefit analysis and ethical analysis framed in context of the aftermath of the financial crisis and great recession. The ninth edition considers how policy has been impacted by persistent unemployment and growing income inequality. In addition, Peters discusses the strain on education budgets, increased oversight of financial activities, fiscal policies meant to stimulate the economy and the political challenge of balancing the budget in light of increased public spending.

this book by two leading experts takes a fresh look at the nature of television starting from an audience perspective it draws on over twenty years of research about the audience in the united states and britain and about the many ways in which television is funded and organized around the world the overall picture which emerges is of a medium which is watched for several hours a day but usually at only a low level of involvement an audience which views mainly for relaxation but which actively chooses favourite programmes a flowering of new channels but with no fundamental change in what or how people watch programmes costing millions to produce but only a few pennies to view a wide range of programme types apparently similar to the range of print media but with nothing like the same degree of audience segmentation a global communication medium of dazzling scale speed and impact but which is slow at conveying complex information and perhaps less powerful than generally assumed the book is packed with information and insights yet is highly readable it is unique in relating so many of the issues raised by television to how we watch it there is also a highly regarded appendix on advertising as well as technical notes a glossary and references for further reading
