this edited volume describes various analytic methods used by intelligence analysts supporting military operations in Iraq and Afghanistan as members of the Iraq and Afghan Threat Finance Cells. Interagency intelligence teams tasked to disrupt terrorist and insurgent funding all contributors have deployed to Iraq and/or Afghanistan and detail both the bureaucratic and intellectual challenges in understanding terrorist and insurgent finance networks and then designing operations to attack such networks via conventional military operations. Special forces kill capture targeting operations and non kinetic operations such as asset freezing or diplomacy. The analytic methods described here leverage both quantitative and qualitative methods but in a language and style accessible to those without a quantitative background. All methods are demonstrated via actual case studies approved for release by the U.S. government drawn from the analysts' distinct experiences while deployed. This book will be of interest to

current or aspiring intelligence analysts students of security studies anti money laundering specialists in the private sector and more generally to those interested in understanding how intelligence analysis feeds into live operations during wartime at a very tactical level

techniques of financial analysis a market leading bestseller in 10 previous editions provides an effective and intuitive approach to understanding the investment operating and financing decisions that drive a typical organization's overall performance and value it shows readers how to interpret financial reports develop integrated projections understand basic financial modeling and more

this book draws readers attention to the financial aspects of daily life at a corporation by combining a robust mathematical setting and the explanation and derivation of the most popular models of the firm intended for third year undergraduate students of business finance quantitative finance and financial mathematics as well as first year postgraduate students it is based on the twin pillars of theory and analytics which merge in a way that makes it easy for students to understand the exact meaning of the concepts and their representation and applicability in real world contexts examples are given throughout the chapters in order to clarify the most intricate aspects where needed there are appendices at the end of chapters offering additional mathematical insights into specific topics due to the recent growth in knowledge demand in the private sector practitioners can also profit from the book as a bridge builder between university and industry lastly the book provides useful information for managers who want to deepen their understanding of risk management and come to recognize what may have been lacking in their own systems

gibson does not oversimplify financial statements rather it involves readers with the material by using real world examples with emphasis on the analysis and interpretation of the end result of financial reporting financial statements

this text provides information and procedures that enable students to master financial calculators while simultaneously gaining a deeper understanding of financial mathematics

master s thesis from the year 2010 in the subject business economics investment and finance grade 2 0 reutlingen university business adminstration language english abstract the global financial and economic crises resulted for many corporations in a downgraded credit rating within the last 2 to 3 years even a large percentage of them defaulted on their credit obligations due to inherent operational factors the importance of credit ratings will play an even more central role under the currently discussed new basel capital accord basel iii standard poor s 2010 basel iii for global banks the purpose of this research is to explore the relationship between long term credit ratings and selected financial ratios that can be derived by public information such information can be very valuable for companies in order to have a slight control over their credit rating obtained by rating agencies as well as in negotiations with banks and other outside creditors the research design is based on three automotive manufacturers and involves their credit rating over the last decade the data for the financial ratios was collected from respective financial statements the study is based on a correlation and multiple regression analysis using the minitab minitab data analysis software pennsylvania usa software as a statistical platform a step wise approach determined the regression equation with the highest significance the equations were used to detect those variables that have the strongest impact on the credit rating the results for automotive companies with a solid statistical data set are surprisingly high in significance with an adjusted coefficient of determination of over 90 overall it is not feasible to mention which one of the seventeen financial ratios explains the variation in credit rating most reliable because such a statement depends always on the individual company for example to explain the changes in the rating for the ford motor

the authors critically analyze varying approaches to public finance contrasting the orthodox social optimality with the alternative public choice school both schools of thought are given full but critical attention as well as the two schools mentioned above further approaches drawn from other social science disciplines are explained
