aicte sponsored international virtual conference on antenna design 5g communications and network technologies ica5nt 2020 during the month of november 6 7 2020 at velammal institute of technology chennai various cutting edge technologies internet of things iot high speed networks massive mimo communication and antenna design etc are chosen for discussion and on the application fronts as well this conference combines three important ingredients to succeed as a technical society developing technology to make our lives better on one hand we have the academia in close contact with students

the future engineers that very soon will take over the role of being highly qualified professionals in technical companies either in india or abroad on the other hand we have researchers in industry to show their latest advances to transform research into real products

the book focuses on 8051 microcontrollers and prepares the students for system development using the 8051 as well as 68hc11 80x96 and lately popular arm family microcontrollers a key feature is the clear explanation of the use of rtos software building blocks interrupt handling mechanism timers ide and interfacing circuits apart from the general architecture of the microcontrollers it also covers programming interfacing and system design aspects

the book comprises selected papers presented at the international conference on advanced computing networking and informatics icani 2018 organized by medi caps university india it includes novel and original research work on advanced computing networking and informatics and discusses a wide variety of industrial engineering and scientific applications of the emerging techniques in the field of computing and networking

the development of new information societies is being significantly aided by the widespread use of information and communication technology ict in people s day to day lives ict is being utilized in industrialized countries to construct a range of cutting edge applications and services to solve the challenges of establishing sustainable communities this will eventually lead to an increase in the overall quality of human existence as a whole the internet of things iot is a notion that is gaining greater notoriety in the modern world as a result of the growing number of devices that are getting connected to one another via the use of a variety of underlying network technologies the internet of things iot is a network that gives intelligent computer services to things that are connected and individually identifiable also known as devices objects and items another name for this network is the internet of things iot things that are connected to the internet of things are often referred to as smart things due to the fact that they have the capacity to carry out the execution of actions associated with day to day life in a logical method in addition to this the internet of things offers advantages to the manner in which humans interact with one another via communication

this book is a compendium of definitions and explanations of concepts and processes within u commerce provided by publisher

mobile computing provides a comprehensive coverage of both the communication and computing aspects the student friendly style numerous illustrative examples and exercises for each topic discussed make the text ideal for classroom learning mobile computing is designed to serve as a textbook for students in the disciplines of computer science and engineering electronics and communication engineering and information

technology it describes the basic concepts of mobile computing and provides technical information about the various aspects of the subject as also the latest technologies that are currently in use the first few chapters present a balanced view of mobile computing as well as mobile communication including the 2g and 3g communication systems mobile ip and mobile tcp the subsequent chapters provide a systematic explanation of mobile computing as a discipline in itself the book provides an in depth coverage of databases in mobile systems methods of data caching dissemination and synchronization bluetooth irda and zigbee protocols data security mobile ad hoc and wireless sensor networks and programming languages and operating systems for mobile computing devices written in an easy to understand and student friendly manner the book includes several illustrative examples and sample codes a comprehensive set of exercises is included at the end of each chapter

with the technological advancement of mobile devices social networking and electronic services technologies continues to play an ever growing part of the global way of life incorporated into cultural economical and organizational levels technologies concepts methodologies tools and applications 4 volume provides a comprehensive depiction of current and future trends in support of the evolution of information systems applications and the internet through coverage of the latest models concepts and architectures this multiple volume reference supplies audiences with an authoritative source of information and direction for the further development of the internet and based phenomena

the book presents a collection of peer reviewed articles from the international conference on advances and applications of artificial intelligence and machine learning icaaaaiml 2020 the book covers research in artificial intelligence machine learning and deep learning applications in healthcare agriculture business and security this volume contains research papers from academicians researchers as well as students there are also papers on core concepts of computer networks intelligent system design and deployment real time systems wireless sensor networks sensors and sensor nodes software engineering and image processing this book will be a valuable resource for students academics and practitioners in the industry working on ai applications

for book publishing contacts on a global scale international literary market place 2006 is your ticket to the people companies and resources at the heart of publishing in more than 180 countries world wide from afghanistan to zimbabwe with the flip of a page you ll find completely up to date profiles for more than 16 500 book related concerns around the globe including 10 500 publishers and literary agents 1 100 major booksellers and book clubs 1 500 major libraries and library associations and thousands of other book related concerns such as trade organizations distributors dealers literary associations trade publications book trade events and other resources conveniently organized in a country by country format plus ilmp 2006 includes two publisher indexes types of
