this book covers and makes four major contributions 1 analyzing and surveying the pros and cons of current approaches for identifying rumor sources on complex networks 2 proposing a novel approach to identify rumor sources in time varying networks 3 developing a fast approach to identify multiple rumor sources 4 proposing a community based method to overcome the scalability issue in this research area these contributions enable rumor source identification to be applied effectively in real world networks and eventually diminish rumor damages which the authors rigorously illustrate in this book in the modern world the ubiquity of networks has made us vulnerable to various risks for instance viruses propagate throughout the internet and infect millions of computers misinformation spreads incredibly fast in online social networks such as facebook and twitter infectious diseases such as sars h1n1 or ebola have spread geographically and killed hundreds of thousands people in essence all of these situations can be modeled as a rumor spreading through a network where the goal is to find the source of the rumor so as to control and prevent network risks so far extensive work has been done to develop new approaches to effectively identify rumor sources however current approaches still suffer from critical weaknesses the most serious one is the complex spatiotemporal diffusion process of rumors in time varying networks which is the bottleneck of current approaches the second problem lies in the expensively computational complexity of identifying multiple rumor sources the third important issue is the huge scale of the underlying networks which makes it difficult to develop efficient strategies to quickly and accurately identify rumor sources these weaknesses prevent rumor source identification from being applied in a broader range of real world applications this book aims to analyze and address these issues to make rumor source identification more effective and applicable in the real world the authors propose a novel reverse dissemination strategy to narrow down the scale of suspicious sources which dramatically promotes the efficiency of their method the authors then develop a maximum likelihood estimator which can pin point the true source from the suspects with high accuracy for the scalability issue in rumor source identification the authors explore sensor techniques and develop a community structure based method then the authors take the advantage of the linear correlation between rumor spreading time and infection distance and develop a fast method to locate

the rumor diffusion source theoretical analysis proves the efficiency of the proposed method and the experiment results verify the significant advantages of the proposed method in large scale networks this book targets graduate and post graduate students studying computer science and networking researchers and professionals working in network security propagation models and other related topics will also be interested in this book

el encuentro diario con la palabra a través de la lectio divina tiene pleno sentido en sí mismo y es un medio extraordinario para que cada creyente se disponga a la escucha atenta de la palabra pero además la lectura del evangelio de la misa se orienta también a la preparación previa de la celebración de la eucaristía es en ella donde se dan las condiciones genuinas para una auténtica meditación en clave personal pastoral y comunitaria este volumen se centra en los días de adviento y navidad

the common european framework of reference for languages cefr and its companion volume have established themselves as an indispensable reference point for all

aspects of second and foreign language education this book discusses the impact of the cefr on curricula teaching learning and assessment in a wide range of educational contexts identifies challenges posed by the companion volume and sheds light on areas that require further research and development particular attention is paid to three features of the two documents their action oriented approach their focus on plurilingualism and the potential of their scales and descriptors to support the alignment of curricula teaching learning and assessment the book suggests a way forward for future engagement with the cefr taking account of new developments in applied linguistics and related disciplines

the 1973 coups d'état in uruguay and chile were significantly different from other military coups in latin america these two dictatorial regimes began a new era in the subcontinent they became staunch bearers of a national security state doctrine and introduced radical new economic policies more tellingly they gave birth to extreme models of society built on the foundations of what can arguably be considered ideological genocides relying on both rudimentary and sophisticated methods of repression and authoritarianism to establish neoliberal systems that have lasted until today 2013 marked the 40th anniversary of the fall of democratic rule in those countries after four decades the governments of uruguay and chile continue to show deficiencies in bringing the perpetrators of severe human rights violations to face justice 40 years are nothing history and memory of the 1973 coups d'état in uruguay and chile is inspired by the strong memories that these coups still create the range of topics addressed in the contributions gathered here demonstrate that the 1973 coups continue to be key points of interest for researchers across the globe and that the study of these topics is far from exhausted

the world appears to be globalising economically technologically and even to a halting extent politically this process of globalisation raises the possibility of an international legal framework a possibility which has gained pressing relevance in the wake of the recent global economic crisis but for any international legal framework to exist normative agreement between countries with very different political economic cultural and legal traditions becomes necessary this work explores the possibility of such a normative agreement through the prism of national constitutional norms since 1945 more than a hundred countries have adopted constitutional texts which incorporate at least in part a bill of rights these texts reveal significant similarities the canadian charter of rights and freedoms for instance had a marked influence on the drafting of the bill of rights for south africa new zealand and hong kong as well as the basic law of israel similarly the drafts of eastern european constitutions reflect significant borrowing from older texts the essays in this book examine the depth of these similarities in particular the extent to which textual borrowings point to the development of foundational values in these different national legal systems and the extent of the similarities or differences between these values and the priorities accorded to them from these national studies the work analyses the rise of constitutionalism since the second world war and charts the possibility of a consensus on values which might plausibly underpin an effective and legitimate international legal order

in the field of higher education research one of the most fascinating observations is the consistent and permanent expansion of higher education systems worldwide

since the end of the second world war undoubtedly the predominant approach to address these developments has been through quantitative analysis as well as international comparisons the following work examines the particularities of the venezuelan context with the aim of identifying specific features of this worldwide phenomenon in this south american case through a combination of qualitative methods the author proposes a biographical approach for the study of higher education inclusion processes which takes into account the perspectives and experiences of those who have been targeted by an ambitious higher education expansion process the most distinctive feature of this work would be its methodological contribution to the field of higher education research one could also argue that the ethnographic account of the bolivarian missions of education in chavez s venezuela is both original and unprecedented furthermore the writing approach bridges the interests of both academics practitioners of the field and members of the general public
