jacques lacan is now regarded as a major psychoanalytical theorist alongside freud and jung although recognition has been delayed by fierce arguments over his ideas written by a leading lacanian analyst introducing lacan guides the reader through his innovations including his work on paranoia his addition of structural linguistics to freudianism and his ideas on the infant mirror phase it also traces lacan s influence in postmodern critical thinking on art literature philosophy and feminism this is the ideal introduction for anyone intrigued by lacan s ideas but discouraged by the complexity of his writings

the linguistic turn of the english renaissance a lacanian perspective examines a selection of cultural phenomena of the english renaissance all of which include a focus on language from a lacanian perspective the book examines four inter related cultural symptoms of the english renaissance the paucity of painting the interest in rhetoric the emergence of a literary style focusing on form and a fascination with the myth of orpheus the book argues that the english renaissance an apex of rhetorical theory can offer psychoanalysis further knowledge concerning the intrication of language and flesh especially where feminine jouissance is at stake these language centred phenomena emerge against the backdrop of a peculiar configuration of the visual field which in contrast to other cultures of the european renaissance is largely barren of painting other than portraiture the book will be of interest to psychoanalysts scholars of renaissance culture and those interested in the psychoanalytic study of culture

drawing on the author s clinical work with gender variant patients transgender psychoanalysis a lacanian perspective on sexual difference argues for a depathologizing of the transgender experience while offering an original analysis of sexual difference we are living in a trans moment that has become the next civil rights frontier by unfixing our notions of gender sex and sexual identity challenging normativity and essentialisms trans modalities of embodiment can help reorient psychoanalytic practice this book addresses sexual identity and sexuality by articulating new ideas on the complex relationship of the body to the psyche the precariousness of gender the instability of the male female opposition identity construction uncertainties about sexual choice in short the conundrum of sexual difference transgender psychoanalysis features explications of lacanian psychoanalysis along with considerations on sex and gender in the form of clinical vignettes from patricia gherovici s practice as a psychoanalyst the book engages with popular culture and psychoanalytic literature including jacques lacan s treatments of two transgender patients and implements close readings uncovering a new ethics of sexual difference these explorations have important implications not just for clinicians in psychoanalysis and mental health practitioners but also for transgender theorists and activists transgender people and professionals in the trans field transgender psychoanalysis promises to enrich ongoing discourses on gender sexuality and identity

bringing together luce irigaray s early psychoanalytically orientated writings with her more recent and more explicitly political writings irigary and politics weaves together the ontological political and ethical dimensions of irigaray s philosophy of sexual difference in imaginative ways laura roberts argues that irigaray s philosophical political project must be read as a critique of constructions of western modernity and rationality when appreciated in this way it becomes clear how irigaray s thought makes profound interventions into contemporary political movements and decolonial thought themes that have never been covered before in irigaray

scholarship this enables readers to recognise that the question of sexual difference in Irigaray's philosophy is concerned not only with refiguring politics and political action but with the foundational structures that govern existence itself

Georges Ngũgĩ's pathbreaking satire *Giambatista Viko* explores the vexed relations between metropolitan centers and peripheral former colonies through its titular antihero, an African professor at an African studies institute divided between European-focused cosmopolitans and Africanists struggling to write the great African novel and subject to abuse. Viko realizes he can no longer separate the African and the European parts of his multilayered African francophone culture. Viko's fate is a warning about the perils of artistic creation in a world where power is not shared. Part of the wave of African novels of the 1960s and 1970s that grappled with the disenchantments of decolonization, *Giambatista Viko* can be read at once as a Congolese novel, a francophone novel, and a work of world literature.

An essential text that provides students with a dynamic, sophisticated, and controversial look at the critical representation of the child in children's literature, arguing for a more open and eclectic approach, one that celebrates the diverse power, appeal, and possibilities of children's literature. Drawing on psychoanalytically informed perspectives, David Rudd shows students how theory can be both exciting and liberating. This is a thought-provoking supplementary text for modules on children's literature or literary theory, which may be offered at the upper levels of an undergraduate literature degree. In addition, it is a stimulating resource for advanced students who may be studying children's literature or literary theory as part of a taught postgraduate degree in literature.

Neural therapy (NT) has been considered a therapeutic tool, a medical practice, and recently a complex medical system named neural therapeutic medicine (NTM). It is based on an understanding of the nervous system as a network that unifies and integrates the organism and coordinates all pathological and physiological states, maintaining and processing memories of irritative stimuli. Additionally, NTM understands the human being as a complex system, an open thermodynamic system which behaves like an inseparable unity, considering psychological, emotional, physical, and environmental aspects that can self-organize. For this complex system, health and disease are adaptive dynamic processes influenced by several external or internal conditions: genetics, environmental, nutritional, social, occupational, etc. NTM uses an injection of a neurotherapeutic substance, which is a local anesthetic in lower concentrations, generally procaine, as a stimulus that modulates the irritations in the organism that are associated with disease. This book intends to demonstrate that neural therapy has a diverse history of learning and practice and to present its diverse therapeutic applications in different medical fields. It shows several approaches, including Russian and British Nervism, complexity sciences, social, and community-based interventions.
