this 1897 book first reissued in 1984 is a key historical document from the early years of accounting and carefully explains the various points of double entry bookkeeping originally intended as a new method of instruction for students of accounting it now serves to stand as a vital piece of the puzzle of the development of the accounting profession itself

although each of the pieces included in this collection has been cited as an outstanding contribution to the literature on the subject they are not available in most libraries each of them is a classic on the theory of double entry bookkeeping of the nine articles reprinted in this volume originally published in 1984 those by ladelle hotelling and anton are recognized as being the classic articles on the depreciation of a single machine each of these articles was published in a journal that is often not accessible and reprinted here has brought them together in one place for many years accountants have dealt with depreciation and capital maintenance as a static problem this volume recognizes its dynamic aspects

excerpt from principles of double entry bookkeeping the purpose of this treatise as its title implies is to explain the principles which underlie the art of accounting by the double entry method it deals with the interpretation rather than the routine of bookkeeping and limits the discussion to the three essential forms the journal entry the ledger account and the balance sheet it does not propose any change in the routine but it does propose a decided change in the interpretation of accounts and in the method of reporting results what i claim for the book is that it solves the problem of placing double entry bookkeeping upon a rational basis and to the best of my knowledge and belief it presents the first and only solution of that problem it is one of the strangest things in the history of the arts and sciences that this great system of accounting which by reason of its compactness and convenience has come into almost universal use should have attained so high a degree of development on the practical side while on the theoretical side it is and always has been in a state of utter confusion as a rule the study of a useful art has a certain value as mental discipline the art of accounting is the one exception to the rule aside from the so called occult sciences there is nothing which so tends to bewilder the mind and to dull the faculty of reason as the study of double entry bookkeeping in the form in which it is customary to present it about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst

repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

double entry bookkeeping is the foundation of financial accounting if a person does not have proper understanding of double entry bookkeeping the person may find financial accounting difficult as a result of this principle of double entry bookkeeping has been well explained in this book there are many questions and answers on double entry bookkeeping in this book as well

excerpt from principles of double entry bookkeeping what i claim for the book is that it solves the problem of placing double entry bookkeeping upon a rational basis and to the best of my knowledge and belief it presents the first and only solution of that problem it is one of the strangest things in the history of the arts and sciences that this great system of accounting which by reason of its compactness and convenience has come into almost universal use should have attained so high a degree of development on the practical side while on the theoretical side it is and always has been in a state of utter confusion as a rule the study of a useful art has a certain value as mental discipline the art of accounting is the one exception to the rule aside from the so called occult sciences there is nothing which so tends to bewilder the mind and to dull the faculty of reason as the study of double entry bookkeeping in the form in which it is customary to present it about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
