the human condition is the print or manner in which you human beings and humanity as a whole influence those around the human environment the entire world and life herself many human conditions that you leave behind come back to influence you just as well many times you know it well and many times you do not and it is very easy for me to write in these books how wonderful you should be while bringing your most favorable contribution to the world but you have to interconnect with the world as best as you can favorably and unfavorably just the way those around constrain you only to make it through to fulfill your needs and just the way you remain conscious of all environmental conditions influencing your own fulfillment and condition of life in society and in the world you should remain conscious with all conditions that you leave behind you through your own life and behavior because just the way life copes with the environment throughout a continuous sacrifice as science depicts it this outside environment is always alive it is part of life it is made of life and it has you in it just as well along with your loved ones and your entire contribution to the world but if you give in and see your environment as a continuously challenging unfavorable condition since this is what science depicts then you might be tempted to engage in a win lose relationship with the environment unnecessarily while the environment is alive formed of not only nature roads and cities but formed of the entire human society and now if you become a negative condition of the environmental by engaging in a win lose relationship with the environment the entire world has to cope with you exactly as science teaches you become an unfavorable condition in the world and you do not stand a chance because you are only one and they are an entire world and many times it feels indeed as the entire world is against you and when it happens you have to look for answers everywhere in the environment and closer to home just as well within your own human conditions the conditions that you implement in the world yourself and it is even more significantly when you implement these alongside others in organized

groups as mobs armies bands hierarchies brotherhoods ideologies and even jurisdictions because life the world and the human society are very complex swinging continuously with and against you since your environment is filled with conditions good bad favorable unfavorable natural and fictitious and it is meaningful to identify predict and control them all throughout this book we study the human condition along with all environmental conditions influencing the human existence as the human condition of life the human social condition and the human higher condition we identify all favorable and unfavorable existential elements along with all their consequences in the human life for a better fulfillment

incubated by the author for more than a decade the book contains profound lessons about humanity this novel raises the question what is it to be human london in the spring of 2000 chris putnam a young scientist working on the human genome project is grieving for the end of his first relationship and for the loss of his deeply religious and estranged father then chris falls in love and his brother goes missing events take chris on a journey from research labs via decadent art scene parties and london s theatreland to the stark loneliness of a psychiatric hospital and ultimately to a desperate decision what chris discovers about himself forces him to address his beliefs his nature and even reality itself incubated by the author for more than a decade the book contains profound lessons and messages about people

this 2025 book the human condition by biologist jeremy griffith is one of his three most important presentations on the human condition serving as a powerful short in length bridge between the other two his very short introduction in the interview and his comprehensive presentation in freedom it also takes his human race saving insights to a new depth of clarity so it is a must read it is not a big book but has everything in it bam bam bam step by step massive explanation after massive explanation before you know it you re right at the bottom of the well looking in on the horror and reality of our prison of depression and anger and you just know it s true it s so obvious and clear and then it just keeps going just keeps giving example after example of the problem which all the time is coupled with the relief of the redeeming understanding of ourselves and the freedom to leave all the madness behind now that humanity s great battle is won this book is everything it s all undeniable it just puts an end to the human condition forever kills it stone dead thank goodness

the human condition is defined as the characteristics key events and situations which compose the essentials of human existence such as birth growth emotionality aspiration conflict and mortality this is a very broad topic which has been and continues to be pondered and analyzed from many perspectives including those of religion philosophy history art literature anthropology sociology psychology and biology as a literary term the human condition is typically used in the context of ambiguous subjects such as the meaning of life or moral concerns each major religion has definitive beliefs regarding the human condition for example buddhism teaches that life is a perpetual cycle of suffering death and rebirth from which humans can be liberated via the noble eightfold path in contrast christianity teaches that humans are born in a sinful condition and are doomed in the afterlife unless they receive salvation through jesus christ philosophers have provided many perspectives an influential ancient view was that of the republic in which plato explored the question what is justice and postulated that it is not primarily a matter among individuals but of society as a whole prompting him to devise a utopia two thousand years later ren descartes declared i think therefore i am because he believed the human mind particularly its faculty of reason to be the primary determiner of truth for this he is often credited as the father of modern philosophy one such modern school existentialism attempts to reconcile an individual s sense of disorientation and confusion in a universe believed to be absurd many works of literature provide perspective on the human condition one famous example is shakespeare s monologue

all the world is a stage that pensively summarizes seven phases of human life psychology has many theories such as Maslow's hierarchy of needs and the notion of identity crisis it also has various methods e.g. the logotherapy developed by Holocaust survivor Viktor Frankl to discover and affirm human meaning another method cognitive behavioral therapy has become a widespread treatment for clinical depression ever since 1859 when Charles Darwin published on the origin of species the biological theory of evolution has been significant the theory posits that the human species is related to all others living and extinct and that natural selection is the primary survival factor this has provided a basis for new beliefs e.g. social darwinism and for new technology e.g. antibiotics humanity is a virtue associated with basic ethics of altruism derived from the human condition humanity differs from mere justice in that there is a level of altruism towards individuals included in humanity more so than the fairness found in justice that is humanity and the acts of love altruism and social intelligence are typically person to person strengths while fairness is generally expanded to all Peterson Seligman in character strengths and virtues place humanity as one of six virtues that are consistent across all cultures the concept goes back to the development of humane or humanist philosophy during the renaissance and the concept of humanitarianism in the early modern period resulting in modern notions such as human rights the purpose of this series of books is to illuminate the necessity to emphasize our common humanity and eliminate the battles and divisiveness that exist in the ongoing religious struggles this book is designed to be an overview of the topic and provide you with the structured knowledge to familiarize yourself with the topic at the most affordable price possible the accuracy and knowledge is of an international viewpoint as the edited articles represent the inputs of many knowledgeable individuals and some of the most currently available general knowledge on the topic based on the date of publication

this book gives insight to why we struggle with the circumstances of our life experience in the human condition we become proficient at failing in part due to the complexity of our human nature our self definition remains unclear as we are hampered by the influencers of inner and outer conditioning our focus and best efforts to live in the sphere of personal dominion has been stifled as we are encouraged to exhaust precious time floundering in the cosmic world of circumstance many of us learn and react to countless circumstances with a high percentage of pre conditioned responses and why do we cling to this pavlovian type conditioning why does the dynamic of fear and frustration reoccur time and again how can we live at the height of our potential without possessing the personal assurance of who we are where we are and why we are here we are conditioned to conform to a global mindset which is designed to heighten our intrinsic need for acceptance approval and comfort we learn to embrace the pain of circumstantial and spiritual aloofness through a multi layered regiment of global social and generational conditioning as a result we display the remains of a mutilated and diminished self image as our lifelong definition our fears and insecurities create the perfect environment for debilitating stagnation which hampers our willingness to pursue and embrace change through personal empowerment the result is the lack of growth and awareness to the boundless potential lying dormant within each of us we are discouraged from embracing the reality therefore we remain unaware of the echoes and their influence within our exclusive domain the human condition when we learn to embrace our original and true definition the realization of the human condition broadens we gain a clearer insight into what we cannot see through the darkened lens of our individual reality the echoes have always been here in plain view watching whispering and influencing the host of humanity they the echoes are forever serving their purpose or reason as they migrate throughout the ambiguous sphere of the human condition
