rivers landscapes whole territories these are the latest entities environmental activists have fought hard to include in the relentless expansion of rights in our world but what does it mean for a landscape to have rights why would anyone want to create such rights and to what end is it a good idea and does it come with risks this book presents the logic behind giving nature rights and discusses the most important cases in which this has happened ranging from constitutional rights of nature in ecuador to rights for rivers in new zealand colombia and india mihnea tanasescu offers clear answers to the thorny questions that the intrusion of nature into law is sure to raise

in this incisive new work eli friedlander demonstrates that walter benjamin s entire corpus from early to late comprises a rigorous and sustained philosophical questioning of how human beings belong to nature across seemingly heterogeneous writings friedlander argues benjamin consistently explores what the natural in the human comes to that is how nature is transformed actualized redeemed and overcome in human existence the book progresses gradually from benjamin s philosophically fundamental writings on language and nature to his goethean empiricism from the presentation of ideas to the primal history of the paris arcades friedlander s careful analysis brings out how the idea of

natural history inflects benjamin s conception of the work of art and its critique his diagnosis of the mythical violence of the legal order his account of the body and of action of material culture and technology as well as his unique vision of historical materialism featuring revelatory new readings of benjamin s major works that differ sometimes dramatically from prevailing interpretations this book reveals the internal coherence and philosophical force of benjamin s thought

nature thou art my goddess edmund s bold assertion in king lear could easily inspire and at the same time function as a lamentation of the inadequate respect of nature in culture in this volume international experts provide multidisciplinary exploration of the insubordinate representations of nature in modern and contemporary literature and art the work foregrounds the need to reassess how nature is already and has been for a while striking back against human domination from the perspective of literary studies art history media studies ethics and philosophy and ethnology and anthropology avenging nature highlights the need of assessing insurgent discourses that converging with counter discourses of race gender or class realize the empowerment of nature from its subaltern position acknowledging the argument that cultural representations of nature establish a relationship of domination and exploitation of human discourse over nonhuman reality and that in consequence our regard for nature as humanist critics is instrumental and anthropocentric the present volume advocates for the view that the time has come to finally perceive nature s vengeance and to critically probe into nature s ongoing revenge against the exploitation of culture

the volume results from a seminar sponsored by the foundation for intellectual history at the herzog august bibliothek wolfenbüttel in 1992 starting with the theory of regressus as displayed in its most developed form by william wallace these papers enter the vast field of the renaissance discussion on method as such in its historical and systematical context this is confined neither to the notion of method in the strict sense nor to the renaissance in its exact historical limits nor yet to the aristotelian tradition as a well defined philosophical school but requires a new scholarly approach thus besides galileo zabarella and their circles which are regarded as being crucial for the emergence of modern science in the end of the 16th century the contributors deal with the ancient and medieval origins as well as with the early modern continuity of the renaissance concepts of method and with non regressive methodologies in the various approaches of renaissance natural philosophy including the lutheran and calvinist traditions

one of the most basic problems in the philosophy of science involves determining the extent to which nature is governed by laws this volume presents a wide ranging overview of the contemporary debate and includes some of its foremost participants it begins with an extensive introduction describing the historical logical and philosophical background of the problems dealt with in the essays among the topics treated in the essays is the relationship between laws of nature and causal laws as well as the role of ceteris paribus clauses in scientific explanations traditionally the problem of the unity of science was intimately connected to the problem of understanding the unity of nature this fourth volume of logic epistemology and the unity of science tackles these problems as part of our consideration of the most fundamental aspects of scientific understanding

reprint of the original first published in 1875

this anthology of spiritual treatments of nature and the environment presents an uplifting and universal approach to appreciating the natural order from a muslim perspective each chapter is introduced with a passage from the qur an and followed by pieces that highlight the human role in maintaining balance in the world selections range from poems to short essays and cover topics such as unity interdependence communication the four elements diversity and wonder including contributions from muhammad asad alain de botton thomas berry guy eaton seyyid hossein nasr and vanda shiva these reminders of the power of the divine order allow for a deeper appreciation of the interdependence of life and nature from the alibris

we live inside a nautilus of prayer if only we open our senses and perceive what is infused all around throughout millennia and across the monotheistic religions the natural was often revered as a sacred text by the middle ages this text was given a name the book of nature the first best entry point for encounter with the divine the very act of reading the world of focusing our attention on each twinkling star and unfurling blossom humbles us and draws us into sacred encounter as we grapple to make sense of today s tumultuous world one where nature is at once a damaged and damaging source of disaster as well as a place of refuge and retreat we are called again to examine how generously it awaits our attention and devotion standing ready to be read by all weaving together the astonishments of science the profound wisdom and literary gems of thinkers poets and observers who have come before us and her own spiritual practice and gentle observation barbara mahany reintroduces us to the book of nature an experiential framework of the divine god s first revelation came to us through an ongoing creation one that through stillness and attentiveness to the rumblings of the heavens the seasonal eruptions of earth the invisible pull of migration of tide and of celestial shiftings draws us into sacred encounter we needn t look farther for the divine
