for the solution of the caste question buddha is not enough ambedkar is not enough either marx is a must this is neither buddha s biography nor ambedkar s further it is not marx s biography either this is a discussion concerning the dalit question based exclusively on ambedkar s writings however i have confined myself only to those writings that deal with the dalit question and caste system ambedkar had also discussed other issues like division of labour division of labourers poverty unemployment and economic exploitation these issues are connected with the dalit question and the caste system hence all these issues find place in this book ambedkar had also written on other themes like the problem of the rupee and large scale industry but i have not included those issues which are not directly connected with the dalit question even regarding gandhi i have not considered issues other than those ambedkar cited in connection with the dalit question for the purpose of this essay i wanted to rely only on ambedkar s writings but in couple of contexts where i could not find relevant information in ambedkar s works i had to turn to a few references from his biographies i have given these details in the respective contexts the world needs the theory that is powerful

enough to illuminate the path it is irrelevant whether that theoretician is buddha marx ambedkar or someone else that which remedies the disease alone is a medicine that which emancipates from sufferings alone is the higher path if it is buddhism we are obliged to follow it to revere it the question however is to ascertain which is the higher path this is the thing which we must ascertain we are obliged to follow the thing which we ascertain to be the higher path we need to read ambedkar s writings in order to arrive at a correct understanding of many issues which he discussed the caste system untouchability poverty buddhism marxism etc we have to read them carefully and seriously whatever we read we have to take everything that is useful we have to follow it we have to correct whatever needs correction we have to abandon whatever is not useful to do all this however we must first understand ambedkar s ideas correctly problems like castes and untouchability are not things that have arisen so to speak yesterday or today they have been entrenched for thousands of years but we don t have any written literatureother than religious texts and some inscriptionsthat tells about them the available sources may not be useful in many contexts yet they may be useful to some extent in some contexts when we don t find clear cut bases for the problems however there is no way out except attempting to understand them by means of our own logic
