a properly structured financial model can provide decision makers with a powerful planning tool that helps them identify the consequences of their decisions before they are put into practice introduction to financial models for management and planning second edition enables professionals and students to learn how to develop and use computer based models for financial planning this volume provides critical tools for the financial toolbox then shows how to use them tools to build successful models

since the 1960s operations research or alternatively management science has become an indispensable tool in scientific management in simple words its goal on the strategic and tactical levels is to aid in decision making and on the operational level automate decision making its tools are algorithms procedures that create and improve solutions to a point at which optimal or at least satisfactory solutions have been found while many texts on the subject emphasize

methods the special focus of this book is on the applications of operations research in practice typically a topic is introduced by means of a description of its applications a model is formulated and its solution is presented then the solution is discussed and its implications for decision making are outlined we have attempted to maximize the understanding of the topics by using intuitive reasoning while keeping mathematical notation and the description of techniques to a minimum the exercises are designed to fully explore the material covered in the chapters without resorting to mind numbing repetitions and trivialization

this first detailed historical treatment of the electron microscope in biology advances an original philosophical argument on the relation of experimental technology to scientific change

the new edition of quantitative methods for business and management offers a complete introductory course in quantitative methods providing students with basic practical experience in quantitative approaches in modelling and analysis for business and management the book features sections on foundation topics models for business and management and modelling and analyzing decisions in particular the new edition features greater coverage of statistics to reflect teaching in this area with chapters on elementary statistics summary statistics and inferential statistics other new areas of coverage in the second edition include network models and non linear models the book retains its popular style which offers students numerous examples accompanied by clear and straightforward explanations excel examples are also integrated throughout to help students to understand how this software tool is used by managers and frequent questions and exercises enable students to test their understanding a free cd contains excel applications and solutions to the exercises in the textbook and a full online learning centre completes an excellent learning package for business students

cinophilia and history or the wind in the trees is in part a history of cinophilia in part an attempt to recapture the spirit of cinophilia for the discipline of film studies and in part an experiment in cinephilic writing cinephiles have regularly fetishized contingent marginal details in the motion picture image the gesture of a hand the wind in the trees christian keathley demonstrates that the spectatorial tendency that produces such cinematic encounters a viewing practice marked by a drift in visual attention away from the primary visual elements on display in fact has clear links to the origins of film as defined by andr  bazin roland barthes and others keathley explores the implications of this ontology and proposes the cinephiliac anecdote as a new type of criticism a method of historical writing that both imitates and extends the experience of these fugitive moments
