metal chelators are emerging as versatile tool with many medical applications their versatility allows them to be used in chelation therapy for treating diseases caused by toxic and heavy metal poisoning chelating agents are capable of binding to toxic metal ions to form complex structures which are easily excreted from the body removing them from intracellular or extracellular spaces in addition metal chelators can also be applied as contrast agents in mri scanning metal chelation in medicine provides a clear and timely perspective on the role of chelating agents in the management of metal intoxications and storage diseases written by leaders in the field of chelators this publication is at the cutting edge of the subject it covers a broad range of topics such as the use of metal chelators in non invasive assessment of brain iron overload and the treatment of systemic iron overload and neurodegenerative diseases as such it is particularly valuable to clinicians treating metal poisonings and metal storage diseases however it is also a useful text for researchers industry professionals and university students with a specific interest in medicinal chemistry chelation metal ions imaging and non invasive techniques

archaeology has long dealt with issues of identity and especially with ethnicity with modern approaches emphasising dynamic and fluid social construction the archaeology of the iron age in particular has engendered much debate on the topic of ethnicity fuelled by the first availability of written sources alongside the archaeological evidence which has led many researchers to

associate the features they excavate with populations named by greek or latin writers some archaeological traditions have had their entire structure built around notions of ethnicity around the relationships existing between large groups of people conceived together as forming unitary ethnic units on the other hand partly influenced by anthropological studies other scholars have written forcefully against iron age ethnic constructions such as the celts the 24 contributions to this volume focus on the south east europe where the iron age has until recently been populated with numerous ethnic groups with which specific material culture forms have been associated the first section is devoted to the core geographical area of south east europe bulgaria croatia romania serbia and slovenia as well as albania and the former yugoslav republic of macedonia the following three sections allow comparison with regions further to the west and the south west with contributions on central and western europe the british isles and the italian peninsula the volume concludes with four papers which provide more synthetic statements that cut across geographical boundaries the final contributions bringing together some of the key themes of the volume the wide array of approaches to identity presented here reflects the continuing debate on how to integrate material culture protohistoric evidence largely classical authors looking in on first millennium bc societies and the impact of recent nationalistic agendas
