grennan bases his evaluation of arguments on two criteria logical adequacy and pragmatic adequacy he asserts that the common formal logic systems while logically sound are not very useful for evaluating everyday inferences which are almost all deductively invalid as stated turning to informal logic he points out that while more recent informal logic and critical thinking texts are superior in that their authors recognize the need to evaluate everyday arguments inductively they typically cover only inductive fallacies ignoring the inductively sound patterns frequently used in successful persuasion to redress these problems grennan introduces a variety of additional inductive patterns concluding that informal logic texts do not encourage precision in evaluating arguments grennan proposes a new argument evaluation procedure that expresses judgments of inferential strength in terms of probabilities based on theories of stephen toulmin roderick chisholm and john pollock his proposed system allows for a more precise judgment of the persuasive force of arguments

randy ramal argues that philosophy s main responsibility lies in providing intelligibility to the ordinary language of everyday life while dispelling unwarranted skepticism philosophers need to go the hard way to fulfill this responsibility because of the constant and dangerous temptation to turn philosophy into a normative discipline rather than keep it as a descriptively hermeneutical enterprise in on philosophy intelligibility and the ordinary going the bloody hard way the philosophy of alfred north whitehead is central to ramal s

endeavor to demonstrate the need to separate the hermeneutical responsibility of philosophy from the normative aspects of responsibility while showing the futility of labeling Whitehead as a purely disinterested philosopher who abandons the idea that ordinariness is relevant to good philosophical thinking. Ramal frames this discussion within a larger in-depth engagement with a vast number of thinkers, philosophers, and literary figures whose works touch on the question of the ordinary.
