for more than forty years jan gehl has helped to transform urban environments around the world based on his research into the ways people actually use or could use the spaces where they live and work in this revolutionary book gehl presents his latest work creating or recreating cityscapes on a human scale he clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes he believes they should be cities for people taking into account changing demographics and changing lifestyles gehl emphasizes four human issues that he sees as essential to successful city planning he explains how to develop cities that are lively safe sustainable and healthy focusing on these issues leads gehl to think of even the largest city on a very small scale for gehl the urban landscape must be considered through the five human senses and experienced at the speed of walking rather than at the speed of riding in a car or bus or train this small scale view he argues is too frequently neglected in contemporary projects in a final chapter gehl makes a plea for city planning on a human scale in the fast growing cities of developing countries a toolbox presenting key principles overviews of methods and keyword lists concludes the book the book is extensively illustrated with over 700 photos and drawings of examples from gehl s work around the globe

how do we accommodate a growing urban population in a way that is sustainable equitable and inviting

this question is becoming increasingly urgent to answer as we face diminishing fossil fuel resources and the effects of a changing climate while global cities continue to compete to be the most vibrant centers of culture knowledge and finance jan gehl has been examining this question since the 1960s when few urban designers or planners were thinking about designing cities for people but given the unpredictable complex and ephemeral nature of life in cities how can we best design public infrastructure vital to cities for getting from place to place or staying in place for human use studying city life and understanding the factors that encourage or discourage use is the key to designing inviting public space in how to study public life jan gehl and birgitte svarre draw from their combined experience of over 50 years to provide a history of public life study as well as methods and tools necessary to recapture city life as an important planning dimension this type of systematic study began in earnest in the 1960s when several researchers and journalists on different continents criticized urban planning for having forgotten life in the city city life studies provide knowledge about human behavior in the built environment in an attempt to put it on an equal footing with knowledge about urban elements such as buildings and transport systems studies can be used as input in the decision making process as part of overall planning or in designing individual projects such as streets squares or parks the original goal is still the goal today to recapture city life as an important planning dimension anyone interested in improving city life will find inspiration tools and examples in this invaluable guide

drawing from research and examples about resilient cities this book looks at new initiatives and innovations cities can implement

this new volume in the gci s readings in conservation series brings together a selection of seminal writings on the conservation of historic cities this book the eighth in the getty conservation institute s readings in conservation series fills a significant gap in the published literature on urban conservation this topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide no single volume has presented a comprehensive selection of these important writings until now this anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability with more than sixty five texts ranging from early polemics by victor hugo and john ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered the book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development

imagine waking up to the gentle noises of the city and moving through your day with complete confidence that you will get where you need to go quickly and efficiently soft city is about ease and comfort where density has a human dimension adapting to our ever changing needs nurturing relationships and accommodating the pleasures of everyday life how do we move from the current reality in most cities

separated uses and lengthy commutes in single occupancy vehicles that drain human environmental and community resources to support a soft city approach in soft city david sim partner and creative director at gehl shows how this is possible presenting ideas and graphic examples from around the globe he draws from his vast design experience to make a case for a dense and diverse built environment at a human scale which he presents through a series of observations of older and newer places and a range of simple built phenomena some traditional and some totally new inventions sim shows that increasing density is not enough the soft city must consider the organization and layout of the built environment for more fluid movement and comfort a diversity of building types and thoughtful design to ensure a sustainable urban environment and society soft city begins with the big ideas of happiness and quality of life and then shows how they are tied to the way we live the heart of the book is highly visual and shows the building blocks for neighborhoods building types and their organization and orientation how we can get along as we get around a city and living with the weather as every citizen deals with the reality of a changing climate soft city explores how the built environment can adapt and respond soft city offers inspiration ideas and guidance for anyone interested in city building sim shows how to make any city more efficient more livable and better connected to the environment

both campaigns are treating people like simpletons in more human read the truth about brexit from someone who really knows in this powerful manifesto steve hilton argues that the frustrations people feel with government politics their economic circumstances and their daily lives are caused by deep structural problems with the systems that dominate our modern world systems that have become too big bureaucratic and distant from the human scale he shows how change is possible offering us a more human way of living

architecture was fundamental to the realization of welfare state policy in the nordic countries translating democratic ideals into concrete spatial materializations an inclusive notion of welfare for all was embraced by a generation of architects landscape architects and planners who labored to give physical form to ideas of equality collectivity and democracy producing a vast architectural output in scandinavia during the postwar years today however the architectural legacy of this era is contested welfare for all no longer enjoys the social or political consensus it once did this publication critically engages with this contested architectural legacy and provides a nuanced portrait of postwar welfare architecture coming to terms with a contentious past and facing an uncertain future with newly commissioned photographic work by contemporary nordic artists based on an interdisciplinary research project by kth stockholm oslo school of architecture university of copenhagen internationally renown contributors shed light on aspects of the relationship between architecture and welfare

this book explores a cultural understanding of cities and processes of civic learning by scrutinizing urban educational topics from a cultural studies perspective this book approaches the city as a cultural fabric that consists of social material and symbolic dimensions and describes how civic learning is not an accidental outcome of cities but an essential component through which citizens coproduce the city through a

combination of theoretical development and methodological reflection the chapters in the book explore three interrelated questions addressing the relationships between culture learning and the city how does civic learning appear in urban spaces how does civic learning take place through urban spaces how are urban spaces created as a result of civic learning
