this book analyses the ideology that china s leader xi jinping has crafted during his decade

in power china's political system and domestic and foreign policies have between 2012 and 2022 become more defined by the political thought of xi Jinping the most powerful leader of the chinese communist party since the time of mao zedong today xi's china is embroiled in superpower rivalry with the united states and its allies therefore ongoing ideological transformation in the people's republic is destined to have global repercussions yet surprisingly the ideological mission of xi Jinping is poorly understood based on analysis of xi Jinping's collected speeches the book argues that china's new state ideology is constructed around the three key concepts of loyalty discipline and greatness xi's mission is about ideological re-orientation and re-activation as well as organizational innovation seeking to frame china's national self as a collective unit under one political banner and one leader however despite the monumental party-state effort to boost the new ideology and state-scripted moral careers the book contends that xi Jinping cannot take for granted that political and patriotic loyalty will forever trump the formation of disloyal moral careers in society

this volume brings together an international group of distinguished scholars to provide a fresh assessment of china's strategic military capabilities doctrines and its political perceptions in light of rapidly advancing technologies an expanding and modernizing nuclear arsenal and increased great power competition with the united states

scientific experiments and medical improvements in recent years have augmented our bodies made them manipulable our personal data have been downloaded stored sold analyzed and the pandemic has given new meaning to the idea of virtual presence such phenomena are often thought to belong to the era of the posthuman an era that both promises and threatens to redefine the notion of the human what does it mean to be human can technological advances impact the way we define ourselves as a species what will the future of humankind look like these questions have gained urgency in recent

years and continue to preoccupy cultural and legal practitioners alike how can the law respond and adapt to a world shaped by technology and ai how can it ensure that technological developments remain inclusive while simultaneously enforcing ethical limits to its reach the volume explores how fictional texts whether on the page or on screen negotiate the legal dilemmas posed by the increasing infiltration of technology into modern life

this book examines the consequences of educational segregation from the perspective of social cohesion it investigates the impact of separating students along socioeconomic lines on student attitudes dispositions and outlooks considered important for social cohesion as well as on achievement opening the discussion about the social costs of school segregation the separation of students based on their social background is a

common feature of schooling in many modern systems this is not only due to the influence of residential segregation but also to the effects of policies promoting educational privatisation parental choice and student academic selection by recognising the importance of schooling for citizenship and social integration the chapters in this book explore how the separation of students throughout their school lives can contribute to the division of citizens beyond school and how social segregation in school systems affect social cohesion more broadly by exploring the case of santiago chile the study is a timely contribution to the understanding of the roots of social division and the role that schools play in creating cohesive societies the originality of the approach and the evidence presented draw on implications that should be of interest to a wider audience concerned with contemporary discussions on solidarity and its erosion by educational segregation in urban environments
