the release of this second volume of chips 2020 coincides with the 50th anniversary of moore s law a critical year marked by the end of the nanometer roadmap and by a significantly reduced annual rise in chip performance at the same time we are witnessing a data explosion in the internet which is consuming 40 more electrical power every year leading to fears of a major blackout of the internet by 2020 the messages of the first chips 2020 published in 2012 concerned the realization of quantum steps for improving the energy efficiency of all chip functions with this second volume we review these messages and amplify upon the most promising directions ultra low voltage electronics nanoscale monolithic 3d integration relevant data brain and human vision inspired processing and energy harvesting for chip autonomy the team of authors enlarged by more world leaders in low power monolithic 3d video and silicon brains presents new vistas in nanoelectronics promising moore like exponential growth sustainable through to the 2030s

the chips in present day cell phones already contain billions of sub 100 nanometer transistors by 2020 however we will see systems on chips with trillions of 10 nanometer transistors but this will be the end of the miniaturization because yet smaller transistors containing just a few control atoms are subject to statistical fluctuations and thus no longer useful we also need to worry about a potential energy crisis because in less than five years from now with current chip technology the internet alone would consume the total global electrical power this book presents a new sustainable roadmap towards ultra low energy femto joule high performance electronics the focus is on the energy efficiency of the various chip functions sensing processing and communication in a top down spirit involving new architectures such as silicon brains ultra low voltage circuits energy harvesting and 3d silicon technologies recognized world leaders from industry and from the research community share their views of this nanoelectronics future they discuss among other things ubiquitous communication based on mobile companions health and care

supported by autonomous implants and by personal carebots safe and efficient mobility assisted by co pilots equipped with intelligent micro electromechanical systems and internet based education for a billion people from kindergarden to retirement this book should help and interest all those who will have to make decisions associated with future electronics students graduates educators and researchers as well as managers investors and policy makers introduction towards sustainable 2020 nanoelectronics from microelectronics to nanoelectronics the future of eight chip technologies analog digital interfaces interconnects and transceivers requirements and markets for nanoelectronics its the international technology roadmap for semiconductors nanolithography power efficient design challenges superprocessors and supercomputers towards terabit memories 3d integration for wireless multimedia the next generation mobile user experience mems micro electro mechanical systems for automotive and consumer vision sensors and cameras digital neural networks for new media retinal implants for blind patients silicon brains energy harvesting and chip autonomy the energy crisis the extreme technology industry education and research for the age of nanoelectronics 2020 world with chips

this major work has established itself as the definitive reference in the nanoscience and nanotechnology area in one volume in presents nanostructures micro nanofabrication and micro nanodevices special emphasis is on scanning probe microscopy nanotribology and nanomechanics molecularly thick films industrial applications and microdevice reliability and on social aspects reflecting further developments the new edition has grown from six to eight parts the latest information is added to fields such as bionanotechnology nanorobotics and nems mems reliability this classic reference book is orchestrated by a highly experienced editor and written by a team of distinguished experts for those learning about the field of nanotechnology
