this topical survey focuses on research in tertiary mathematics education a field that has experienced considerable growth over the last 10 years drawing on the most recent journal publications as well as the latest advances from recent high quality conference proceedings our review culls out the following five emergent areas of interest mathematics teaching at the tertiary level the role of mathematics in other disciplines textbooks assessment and students studying practices transition to the tertiary level and theoretical methodological advances we conclude the survey with a discussion of some potential directions for future research in this new and rapidly evolving domain of inquiry

this book features selected papers from the 7th international conference on mathematics and computing icmc 2021 organized by indian institute of engineering science and technology iiest shibpur india during march 2021 it covers recent advances in the field of mathematics statistics and scientific computing the book presents innovative work by leading academics researchers and experts from industry

the international conference on complex networks complenet brings together researchers and practitioners from diverse disciplines working on areas related to complex networks complenet has been an active conference since 2009 over the past two decades we have witnessed an exponential increase in the number of publications and research centres dedicated to this field of complex networks aka network science from biological systems to computer science from technical to informational networks and from economic to social systems complex networks are becoming pervasive for dozens of applications it is the interdisciplinary nature of complex networks that complenet aims to capture and celebrate the complenet conference is one of the most cherished events by scientists in our field maybe it is because of its motivating format consisting of plenary sessions no parallel sessions or perhaps the reason is that it finds

the perfect balance between young and senior participation a balance in the demographics of the presenters or perhaps it is just the quality of the work presented

science has never been more important yet science education faces serious challenges at present science education research only sees half the picture focusing on how students learn and their changing conceptions both teaching practice and what is taught science knowledge itself are missing this book offers new interdisciplinary ways of thinking about science teaching that foreground the forms taken by science knowledge and the language imagery and gesture through which they are expressed this book brings together leading international scholars from systemic functional linguistics a long established approach to language and legitimation code theory a rapidly growing sociological approach to knowledge practices it explores how to bring knowledge language and pedagogy back into the picture of science education but also offers radical innovations that will shape future research part i sets out new ways of understanding the role of knowledge in integrating mathematics into science teaching scientific explanations and using multimedia resources such as animations part ii provides new concepts for showing the role of language in complex scientific explanations in how scientific taxonomies are built and in combining with mathematics and images to create science knowledge part iii draws on the approaches to explore how more students can access scientific knowledge how to teach professional reasoning the role of body language in science teaching and making mathematics understandable to all learners teaching science offers major leaps forward in understanding knowledge language and pedagogy that will shape the research agenda far beyond science education
