by Kelly Bouas Henry, Missouri Western State College and Douglas A. Bernstein, the study guide employs numerous techniques to help students learn each chapter including the optional Industrial/Organizational Psychology chapter. It contains a detailed outline, a key terms section that presents fresh examples and learning aids, plus a fill-in-the-blank test, learning objectives, a concepts and exercises section that shows students how to apply their knowledge of psychology to everyday issues and concerns, a critical thinking exercise, and personal learning activities. In addition, each chapter concludes with a two-part self-quiz consisting of 40 multiple-choice questions. An answer key tells the student not only which response is correct but also why each of the other choices is wrong. Quiz analysis tables enable students to track patterns to their wrong answers either by topic or by type of question: definition, comprehension, or application.

From Edward E. Chatelain, Valdosta State University, Georgia, this study guide helps students review and master the key ideas from every chapter through labeling exercises, chapter reviews with matching statements, plus practice tests and challenge tests that consist of multiple-choice, true/false, matching, and short essay questions.

David Findlay of Colby College has done an outstanding job of writing a student-friendly study guide. Each chapter begins with a presentation of objectives and review. It is organized in the form of a tutorial covering the important points of the chapter with learning suggestions along the way. Quick self-test questions, review problems, and multiple-choice questions follow the tutorial. Solutions are provided for all study guide problems.
