this book provides guidelines for practicing design science in the fields of information  
systems and software engineering research a design process usually iterates over two  
activities first designing an artifact that improves something for stakeholders and  
subsequently empirically investigating the performance of that artifact in its context this  
validation in context is a key feature of the book since an artifact is designed for a context it  
should also be validated in this context the book is divided into five parts part i discusses the  
fundamental nature of design science and its artifacts as well as related design research  
questions and goals part ii deals with the design cycle i e the creation design and validation  
of artifacts based on requirements and stakeholder goals to elaborate this further part iii  
presents the role of conceptual frameworks and theories in design science part iv continues  
with the empirical cycle to investigate artifacts in context and presents the different  
elements of research problem analysis research setup and data analysis finally part v deals  
with the practical application of the empirical cycle by presenting in detail various research  
methods including observational case studies case based and sample based experiments and  
technical action research these main sections are complemented by two generic checklists  
one for the design cycle and one for the empirical cycle the book is written for students as  
well as academic and industrial researchers in software engineering or information systems  
it provides guidelines on how to effectively structure research goals how to analyze research  
problems concerning design goals and knowledge questions how to validate artifact designs

and how to empirically investigate artifacts in context and finally how to present the results of the design cycle as a whole
