women have made significant inroads into political life in recent years but in many parts of the world their increased engagement has spurred attacks intimidation and harassment this book provides the first comprehensive account of this phenomenon exploring how women came to give these experiences a name violence against women in politics tracing its global emergence as a concept mona lena krook draws on insights from multiple disciplines political science sociology history gender studies

economics linguistics psychology and forensic science to develop a more robust version of this concept to support ongoing activism and inform future scholarly work krook argues that violence against women in politics is not simply a gendered extension of existing definitions of political violence privileging physical aggressions against rivals rather it is a distinct phenomenon involving a broad range of harms to attack and undermine women as political actors taking physical psychological sexual economic and semiotic forms incorporating a wide range of country examples she illustrates what this violence looks like in practice catalogues emerging solutions around the world and considers how to document this phenomenon more effectively highlighting its implications for democracy human rights and gender equality the book asserts that addressing this issue requires ongoing dialogue and collaboration to ensure women s equal rights to participate freely and safely in political life around the globe

this book provides a timely and unique contribution to current debates on how effectively voluntary party quotas address the persistent underrepresentation of women in legislatures using a most similar case design and a mixed methods approach the authors draw attention to the ways in which electoral systems and party regulations interface with voluntary party quotas in germany and austria all quota parties in these countries support the goal of equal participation of women and men in elected office and quotas are presented as a means to precisely that end in order to assess parties commitment to their declared goals and the effectiveness of quotas the book introduces the concept of the post quota gender gap and defines it as the difference between a party s adopted quota and the actual share of women in legislative bodies at the national and regional level complementing the existing literature on recruitment and socio cultural legacies the authors argue that the problem of voluntary party quotas lies at the intersection of party quota design and electoral law either parties need to design quotas that actually work within a given electoral system or we need legislative action geared toward advancing parity not just in candidate selection but in the composition of legislatures the book draws on gendered candidate and election data on the party statutes of federal and state level party organizations and on interviews with party officials and party women s organizations

online social network sites snss have become active political forums in the united states and elsewhere during the 2008 presidential election the two major candidates directed significant resources toward the creation and maintenance of sns profiles and pages in an effort to reach out to young voters these efforts garnered substantial media and scholarly attention one of the main demographic targets of these sites individuals aged 18-25 has historically been largely apathetic toward the political process and has demonstrated a low level of engagement in politics this may have changed in the 2008 election with a winning campaign that was well versed in online social networking and engagement yet little is known about how these sites impact young voters in terms of increased participation in the electoral process and the variables that precede participation such as political knowledge and efficacy a person's feeling of political efficacy the confidence that one can both effectively participate in and influence the political process is a determinant of political participation this construct has been broken down into two components internal and external political efficacy ipe and epe respectively and has been further extended into the concept of political information efficacy pie the similarities between the constructs of ipe and pie and their respective measurement scales suggest that the concepts may not be entirely different there is a need for conceptual and operational clarification and

validation a measurement instrument is needed to fill the gap in the literature regarding learning and informational antecedents to political efficacy preliminary research indicates that political candidate social network efforts are largely tools of information provision the proposed instrument will help answer the question of whether snss can be valuable political engagement tools with these two issues in mind the following multi stage research was undertaken using bandura s social cognitive theory 1986 1997 as a theoretical guide the concepts are examined and sorted and a new scale political learning efficacy is developed using both qualitative and quantitative methods next the new scale is used in a nationally representative survey of 18 25 year olds n 625 to examine the effects of previous and continued use of political social networking on ple political knowledge and participation with interesting and informative results results show that use of social network sites for political purposes can have a positive impact on political learning efficacy and thus on knowledge and participation however these results also demonstrate that political participation through social media during the 2008 election was much lower than was anecdotally reported in the news media in addition online sources of news and political information are not the preferred informational source among this demographic contrary to conventional wisdom regarding this group traditional media such as newspapers and televised news are reported as the preferred informational source this research provides a valuable new discipline spanning measure to the political efficacy literature and helps to establish the value of candidate social networking in the political communication arena
