In the 1990s it is no longer news that families do not operate independently from other social organizations and institutions. Instead, it is generally recognized that families are embedded in a complex set of relationships with other institutions and contexts outside the family. In spite of this recognition, a great deal remains to be discovered about the ways in which families are influenced by these outside agencies or how families influence the functioning of children and adults in these extra-familial settings: school, work, day care, or peer group contexts. Moreover, little is known about the nature of the processes that account for this mutual influence between families and other societal institutions and settings. The goal of this volume is to present examples from a series of ongoing research programs that are beginning to provide some tentative answers to these questions. The result of a summer workshop characterized by lively exchanges not only between speakers and the audience but among participants in small group discussions as well, this volume attempts to communicate some of the dynamism and excitement that was evident at the conference. In the final analysis, this book should stimulate further theoretical and empirical advances in understanding how families relate to other contexts.

Do parents with adoptive children see themselves as similar to or different from nonadoptive parents? Is the stigma attached to adoption lessening? Does open communication about adoption contribute to the family's well-being? How successful are adoptive adults at putting their adolescent turmoil behind them? These and many other important and complex questions are addressed in *Families and Adoption*, an informative guidebook that shows you how adoption is both a condition and a lifelong process. *Families and Adoption* discusses legislation that can serve the needs of various members of the adoptive experience to deepen your understanding of the key legal issues associated with consent and openness. It also provides you with detailed coverage of changes in adoption law, open adoption, research results, transracial and transethnic adoption, and the consequences of placing versus parenting for unmarried teenage women who give birth. Graduate students, social workers, adoption professionals, members of adoptive families, and couples wishing to adopt will find there isn't a rock that *Families and Adoption* leaves unturned. It presents you with vital information on the following topics: the developmental stages of reunion between an adoptive child and birth parent; notions of adoption, parenthood, and kinship and how these notions are challenged after a reunion has taken place; the institution of adoption as it has existed for decades in American society; international adoption; respecting the bonds children have and helping them develop critical attachment skills; those who accept open adoption and those who embrace it; flexible parenting styles and their positive effect on developmentally vulnerable adoptees; a skillful blend of personal adoption experiences and research studies. *Families and Adoption* explores the special issues adoption presents and how all parties involved can work together to improve placement decisions, ensure that a woman is confident in her decision to relinquish her child, and help families select the most appropriate adoption arrangement. The book's main strength is that it doesn't just look at the initial considerations of adoption; it prepares you for the issues that will arise along the way.
