machine learning deals with the issue of how to build computer programs  
that improve their performance at some tasks through experience machine  
learning algorithms have proven to be of great practical value in a  
variety of application domains not surprisingly the field of software  
engineering turns out to be a fertile ground where many software  
development and maintenance tasks could be formulated as learning  
problems and approached in terms of learning algorithms this book deals  
with the subject of machine learning applications in software  
engineering it provides an overview of machine learning summarizes the  
state of the practice in this niche area gives a classification of the

existing work and offers some application guidelines also included in the book is a collection of previously published papers in this research area
