against the backdrop of international attempts to prevent the use of weapons of mass destruction this volume of essays by well known analysts examines what the threat to india could entail highlights the differences between state use of these weapons and their use by non state actors discusses possible scenarios india needs to guard against and protective measures it can take and determines the position the indian government needs to take in the international arena in respect of initiatives to prevent the use of weapons of mass destruction a salient feature of the book is the detailed suggestions it offers of efforts required to set up material and human resources to respond to such catastrophes

when i was a child growing up in south america i often went camping in the wild and hence had direct access to the wondrous southern sky the southern cross was all mine at the time little did i know then that the study of the sky would take such a huge importance in my life and that in the end astronomy and astrophysics would in many ways become my country and my religion i have lived in several different countries and when asked my nationality i am always very tempted to reply astronomer i started as a theorist and my only dream in my youth was to spend nights thinking and calculating with paper and pencil and to have the impression by dawn that i had understood something new so at the time astronomy was seen or dreamt by me as a solitary endeavour with periodic encounters with my wise adviser and professors it is this model that i adopted when doing my phd work my generation has lived through many revolutions of all kinds those in astronomy i believe remain particularly remarkable and i am a true product of them now i elect to live and work in large organizations and to share my endeavours with many people and i relish the series of and re heck on organizations and strategies in astronomy which help us recover our memories reconstitute our own story and read with glee about our neighbouring or far away colleagues

at the beginning of the 20th century kristian birkeland 1867 1917 a norwegian scientist of insatiable curiosity addressed questions that had vexed european scientists for centuries why do the northern lights appear overhead when the earth s magnetic field is disturbed how are magnetic storms connected to disturbances on the sun to answer these questions birkeland interpreted his advance laboratory simulations and daring campaigns in the arctic wilderness in the light of maxwell s newly discovered laws of electricity and magnetism birkeland s ideas were dismissed for decades only to be vindicated when satellites could fly above the earth s atmosphere faced with depleting stocks of chilean saltpeter and the consequent prospect of mass starvation birkeland showed his practical side inventing the first industrial scale method to extract nitrogen based fertilizers from the air norsk hydro one of modern norway s largest industries stands as a living tribute to his genius hoping to demonstrate what we now call the solar wind birkeland moved to egypt in 1913 isolated from his friends by the great war he yearned to celebrate his 50th birthday in norway the only safe passage home via the far east brought him to tokyo where he passed away in the late spring of 1917

this book presents studies of complexity in the context of nonequilibrium phenomena using theory modeling simulations and experiments both in the laboratory and in nature

it was with pleasure that caup became for three days the core to the cloud of star formation experts all over the world close to the celebration of its 15th anniversary therefore still in the early stages of institutional evolution we are proud of our multiple activities in astronomy a productive research centre classified as institution of

excellence within the portuguese research units but also an institution of public utility as recognised by the government fifteen years ago we choose to play a role not only in research as expected from any research centre but also in the training of the future astronomers and the promotion of science and scientific culture this choice is clearly stated in our by laws and also in the multiple activities we have carried out since along the years we have organized on a regular basis international workshops similar to cores to clusters sometimes we have chosen to organize international conferences of a larger size on other occasions the choice has been for smaller and more informal discussion meetings or even doctoral schools with very different objectives in common all those meetings have always had besides the formal registered participants a group of informal participants our undergraduate students of astronomy so eager to be in touch with the real world

the founding of the dudley observatory at albany n y in 1852 was a milestone in humanity's age old quest to understand the heavens as the best equipped astronomical observatory in the u s led by the first american to hold a ph d in astronomy benjamin apthorp gould jr the observatory helped pioneer world class astronomy in america it also proclaimed albany's status as a major national center of culture knowledge and affluence this book explores the story of the dudley observatory as a 150 year long episode in civic astronomy the story ranges from a bitter civic controversy to a venture into space from the banks of the hudson river to the highlands of argentina it is a unique glimpse at a path not taken a way of doing science once promising now vanished as discoveries by the dudley observatory's astronomers especially its second director lewis boss made significant contributions to the modern vision of our milky way galaxy as a rotating spiral of more than a million stars the advance of astronomy left that little observatory behind

illustrated throughout this work contains surface and orbital images from spirit opportunity mars express the hubble space telescope and earth based observations plus historic images depicting mars in fiction and mythology movie images and drawings that adorned the pulp sci fi stories of the 1930s

examining nixon's autobiographies and political memorabilia frick offers far reaching perceptions not only of the man but of nixon's version of himself contrasted with those who would interpret him differently he cites reinventions of nixon from the late 1980s particularly the museum at the richard nixon library and birthplace to demonstrate the resilience of certain national mythic narratives in the face of liberal critiques and he recounts how celebrants at nixon's state funeral at which bob dole's eulogy depicted a god fearing american hero attempted to bury the sources of our divisions over him rendering in some minds the judgment of redeemed statesman to erase his status as disgraced president with dozens of illustrations nixon posing with elvis the national archives most requested photo nixonian cultural artifacts classic editorial cartoons no other book collects in one place such varied images of nixon from so many diverse media these reinforce frick's probing analysis to help us

understand why we disagree about nixon and why it matters how we resolve our disagreements book jacket

this first major monograph on the electronic artist rafael lozano hemmer was produced on the occasion of the 2007 venice biennale where lozano hemmer presented six interactive installations becoming the first artist to officially represent mexico at the biennale born in mexico city in 1967 lozano hemmer studied physical chemistry at concordia university in montreal and now uses his background in the sciences to create the large scale public space installations for which he is known working with the concept of relational architecture lozano hemmer s installations employ everything from robotics to sensors to cell phones and video projections to create social situations that alter the ways people relate to urban space describing his piece subtitled public in an interview in this very nicely designed book lozano hemmer says i look for the special defects that allow me to activate the imperfections the disruptions to disrupt seems to be the most precise term for describing what i want to do

the global community has suffered recently from newly emerged infectious diseases and from diseases once thought to be in decline it now faces the threat of a human influenza pandemic arising from the recently emerged avian influenza h5n1 virus the pace of global travel migration and commerce has increased dramatically in recent decades elevating the risk of a global infectious disease outbreak the spread of infectious disease can have significant effects on u s and world security destabilizing nations and regions through direct mortality and morbidity resulting in staggering economic and social loss collection and analysis of information about the worldwide incidence of infectious disease is imperative for the united states to understand and respond to disease threats this study conducted from july through october 2005 examines infectious disease within the context of national security and assesses the need for and adequacy of information that will enable u s policymakers to prevent and respond to such threats at the center of this research is a review of the link between infectious disease and national security as well as interviews with policymakers and other stakeholders to assess their information needs this report includes a list of sources providing public health information and surveillance of infectious diseases worldwide

the first major comprehensive treatment of urban revitalization in 35 years examines the federal government s relationship with urban america from the truman through the clinton administrations provides a telling critique of how in the long run government turned a blind eye to the fate of cities

at head of title national cooperative highway research program
