back to kant and still figures prominently in contemporary epistemology philosophy of mind and ethics by offering a collection of new essays by leading scholars in early modern philosophy and specialists in contemporary philosophy this volume goes beyond the point where nature and normativity came apart and challenges the well established opposition between these all too neatly separated realms it examines how the mind's embeddedness in nature can be conceived as a starting point for uncovering the links between naturally and conventionally determined standards governing an agent's epistemic and moral engagement with the world the original essays are grouped in two parts the first part focuses on specific aspects of theories of perception thought formation and judgment it gestures towards an account of normativity that regards linguistic conventions and natural constraints as jointly setting the scene for the mind's ability to conceptualise its experiences the second part of the book asks what the norms of desirable epistemic and moral practices are key to this approach is an examination of human beings as parts of nature who act as natural causes and are determined by their sensibilities and sentiments each part concludes with a chapter that integrates features of the historical debate into the contemporary context

environmental history has traditionally told the story of man and nature scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender seeing nature through gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions desires and choices have shaped the world and seeing men as gendered actors as well in thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world virginia scharff and her coauthors explore interactions between gender and environment in history ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes they also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies each article shows how a person or group of people in history have understood nature in gendered terms and

acted accordingly often with dire consequences for other people and organisms here are considerations of the ways we study sexuality among birds of william byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities some are playful as in a piece on the evolution of snow bunnies to shred betties others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out aiding and adding significantly to the enterprise of environmental history seeing nature through gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we ve engraved on ourselves and on the planet

one of the most controversial contemporary debates on the concept of health is the clash between the views of naturalists and normativists naturalists argue that although health can be valued or disvalued the concept of health is itself objective and value free in contrast normativists argue that health is a contextual and value laden concept and that there is no possibility of a value free understanding of health this debate has fueled many of the often very acrimonious disputations arising from the claims of health disease and disability activists and charities and the
