this is a book on equity in the civil law tradition from the double perspective of legal history and comparative law it is intended not only for civil lawyers who want to better understand the role and history of equity in their own legal tradition but also and perhaps more saliently for common lawyers who are curious about why the history of equity has unfolded so differently on the continent of europe and in latin america the author begins with the investigation of the philosophical foundations of the western notion of equity in the teachings of plato and aristotle and of how their ideas affected the works of the great attic orators chapter 2 he then addresses the way in which roman law turned this notion into a legal concept of considerable practical importance chapter 3 and how it survived the fall of rome and was later elaborated in the middle ages by civilists and canonists chapter 4 subsequently the author analyses how the notion of equity was dealt with in the modern era by legal humanists protestant and catholic theologians scholars of the usus modernus pandectarum and of roman dutch law and then by legal rationalism and the philosophers of the enlightenment chapter 5 he then deals with the history of equity on the continent since the fragmentation of the ius commune and the codifications of the nineteenth century and with its reception in latin america chapter 6 finally the author offers some closing remarks on the fundamental equivocalness or relativity as some scholars put it of the notion of equity in the civil law tradition today conclusion

this book reconsiders the use of food metaphors and the relationship between law and food in an interdisciplinary perspective to examine how food related topics can be used to describe or identify rules norms or prescriptions of all kinds the links between law and food are as old as the concept of law many authors have been using such links in creative ways to express specific features of law this is because the language of food and cooking offers legal thinkers and teachers mouth watering metaphors comparing rules to recipes and their combination to culinary processes this collection focuses on this relationship between law and food and takes us far beyond their mere interaction to explore different ways of using these two apparently so diverse elements to describe different phenomena of the legal reality the authors use the link between food and law to describe different aspects of the legal landscape in different areas and jurisdictions bringing together metaphors and indirect correlations between law and food the book explores different models of approaching legal issues and considering different legal challenges from a completely new perspective in line with the multidisciplinary approach that leads comparative legal studies today and to a certain extent revisiting and enriching it with contributions in english and french the book will be of interest to academics and researchers working in the areas of law and food law and language

and comparative legal studies
