negotiations on trade facilitation were concluded at the wto 9th ministerial conference in 2013 and the agreements on trade facilitation tfa therefore became the first fully multilateral agreement in wto history since then trade facilitation has been in the limelight on the stage of the world trading system during recent years the tfa has been consistently on the agenda of the summits of g20 g7 and apec the agreement has come into force and shall be implemented on a global scale as a result the wto members shall be prepared to translate the agreement into their domestic legislation which will involve a series of reforms in trade laws and policies there are extensive voices demanding a comprehensive expatiation on trade facilitation and the tfa it is essential to systematically delve into the genesis of trade facilitation revisit the course where the tfa came into being and analyse the well turned legalese of the tfa this book meets this demand this book is path breaking in these aspects it expounds on the rationales for trade facilitation and the significance of constituting an international accord on trade facilitation it restores the one century track of the international community s talks on trade facilitation from the times of the league of nations to the wto era it reveals how the wto negotiating mechanisms enabled the tfa to be nailed down which would be enlightening for trade diplomats engaged in other wto negotiations and it provides an in depth commentary on the tfa articles which will help stakeholders more accurately understand and implement the agreement this book will be especially valuable for government officials and policy makers trade practitioners lawyers advisers and scholars interested in international economic law wto law international trade international relations and international development studies

praised for its authoritative coverage global political economy places the study of international political economy ipe in its broadest theoretical contextnow updated to cover the continuing global economic crisis and regional relationships and impacts this text not only helps students understand the fundamentals of how the global economy works but also encourages them to use theory to more fully grasp the connections between key issue areas like trade and development written by a leading ipe scholar this text equally emphasizes theory and practice to provide a framework for analyzing current events and long term developments in the global economy new to the seventh edition focuses on the ongoing global economic crisis and the continuing european sovereign debt crisis along with other regional economic issues including their implications for relationships in the global economy offers fuller and updated discussions of critical perspectives like feminism and environmentalism and includes new material differentiating among the terms neomercantilism realism mercantilism and economic nationalism updated author written test bank is provided to professors as an e resource on the book s webpage

this book argues that the trade distorting effects of advantages associated with soes are more severe from an economic perspective and the behavior of soes after receiving advantages is of more concern compared to private owned enterprises. The premise is that the existence of soes per se is not the essential problem rather the underlying problems are i the disproportionate granting of advantages to soes compared to poes and ii the behavior of soes once they receive advantages. The book offers a systematic analysis focusing on the various advantages granted to soes and their subsequent behavior. Its detailed analysis reveals the inadequacy of current wto rules and is complemented by a number of concrete proposals.

Principles of International Economic Law provides a comprehensive overview of the central topics in international economic law with an emphasis on the interplay between the different economic and political interests on both the international and domestic levels. Following recent tendencies, the book sets the classic topics of international economic law like wto law, investment protection, commercial law and monetary law in context with aspects of human rights, environmental protection and the legitimate claims of developing countries. The book draws a concise picture of the architecture of international economic law with all its complexities without getting lost in fragmented details, providing a perfect introductory text to the field of international economic law. The book thoroughly analyses legal developments within their wider political, economic or social context. Topics covered range from codes of conduct for multinational enterprises to the human rights implications of the exploitation of natural resources. The book demonstrates the economic foundations and economic implications of legal frameworks. It puts into profile the often complex relationship between on the one hand international standards on liberalization and economic rationality and on the other state sovereignty and national preferences. It describes the new forms of economic cooperation which have developed in recent decades such as the growing number of transnational companies in the private sector and forms of cooperation between states such as the g8 or g20. This fully updated second edition covers new aspects and developments including the growing importance of corporate social responsibility, mega regional agreements like CETA, TTIP and TPP, trade and investment related aspects of human rights law.

examines the wto rules governing industrial subsidies as established by the SCM Agreement and interpreted by relevant case law.

This book examines the relationship between flexible regional economic integration in the East African Community (EAC) through its application of variable geometry and the establishment of the African Continental Free Trade Area (AfCFTA) as a continent-wide form of integration. It uses a historical, political, legal and economic analysis of the processes that led to the adoption of flexible regional integration in Africa with particular regard to the EAC. This takes place in the inescapable context of pan-Africanism, showing how regional integration efforts in Africa are based on pan-Africanist ideals and how an evolution of these ideals has led to an evolution in the goals of integration with growing awareness of the weaknesses and impracticality of consensus-based decision making on a global level. It makes the case for the pursuit of flexibility in multilateral trade, drawing lessons from the experience of the AfCFTA and blocs in other regions. This book is a historical evaluation of regional economic integration efforts in Africa and it follows the path of attempts to integrate the economies on the continent from colonial times to the birth of the AfCFTA. While it is a study in law, it relies heavily on politics, economics and history to weave together a more complete theory of economic integration based on the African experience. Flexible regional economic integration in Africa was awarded the 2020 Siel Hart Prize in International Economic Law.

For courses in international economics, international finance and international trade. A balanced, global approach to economic theory and policy applications. International economics theory and policy provides engaging, balanced coverage of the key concepts and

practical applications of theory and policy around the world divided into two halves with the first devoted to trade and the second to monetary questions the text provides an intuitive introduction to theory and events as well as detailed coverage of the actual policies put into place as a response in the 12th edition important economic developments are highlighted with many lessons drawn from the recent covid 19 pandemic experience using examples like these the text equips students with the intellectual tools for understanding the changing world economy and economic implications of global interdependence
